New Items with Category Major

Microsoft 365 admin center: Microsoft 365 Priority Accounts **67145**

As the admin of a Microsoft 365 organization, you can now monitor failed or delayed email messages sent to your users who have a high business impact, like your CEO. You can enable this by adding users to your priority accounts list. Priority accounts are accounts that are essential to running your organization. Add executives, leaders, managers or other users who have access to sensitive or high priority information. The priority accounts feature is available only to organizations that meet both of the following requirements: Office 365 E3 or Microsoft 365 E3, or Office 365 E5 or Microsoft 365 E5; and at least 10,000 licenses and at least 50 monthly active Exchange Online users.

What's New in the Microsoft Intune Service Update for September

MC222603

Your Microsoft Intune account has been updated to the latest service build.

How does this affect me?

You will see the service release number updated in the Tenant Status blade of the Intune console soon. We've introduced some changes that we're excited for you to try out.

What do I need to do to prepare for this change?

Click additional information below to learn more about what's new in this service release. We'll continue to update the What's New page with any features that are released between now and the next monthly service update.

More information on how the Intune service updates each month is in this blog post: "<https://techcommunity.microsoft.com/t5/intune-customer-success/microsoft-intune-service-updates/ba-p/358728>"

style="background-color: rgb(255, 255, 255)">Microsoft Intune Service Updates

Push notifications for work accounts in Microsoft To Do

MC222629

Microsoft To Do mobile will soon support push notifications for shared list activities on work accounts. If you do nothing, when this feature rolls out, users in your organization will receive push notifications in the Windows, Android, and iOS versions of To Do for shared list activities such as task added, task completed, and task updated.

Key points

Microsoft 365 "<https://www.microsoft.com/microsoft-365/roadmap?filters=searchterms=67114>" Roadmap ID 67114

Timing: administration control available on September 22, 2020

Linked Item Details

67114 Title : Microsoft To Do: Support for push notifications for shared list activities for work and school accounts
67114 Description: This update adds the ability to create Microsoft To Do push notifications in Work and School accounts just as you can in your Personal account.

MS Preperations

The admin toggle will be accessible on September 22, 2020. You should review it to ensure that it is set to the experience appropriate for your organization. Any changes may take up to 24 hours to go into effect.
Should you enable this feature in your tenant, you might want to update your training and documentation.
To review or change the setting, go the Microsoft 365 admin center.
Navigate to Settings > Org settings
Under Services, select Microsoft To Do
Select the box next to Allow your users to receive push notifications for shared list activities to turn push notifications on or off.

MS How does it affect me

This feature will be enabled unless you take action before Monday, October 19, 2020. On that date, users in your organization will receive push notifications for shared list activities.

| Created: | 09/23/2020 |
| Product: | Power Automate, SharePoint |
| Platform: | Developer, Online, World tenant |
| Scope: | Administration, Developer, User |
| Ring: | |

As communicated in MC217999 (July '20), with the continued investment in Power Automate as the universal solution to workflow, Microsoft is retiring SharePoint 2010 workflows.

Additionally, we will begin implementing a new banner (example text below) that will be displayed on multiple workflow pages to remind users about the upcoming retirement.

"Starting November 1, 2020 6:00:00 AM, SharePoint 2010 workflows will be retired and users will no longer have the ability to run or create 2010 Workflows. The date displayed in the banner applies to your specific organization. For general dates and information about retirement, visit "<https://aka.ms/sp-workflows-support>" style="" https://aka.ms/sp-workflows-support"

Key Points:

Major: Retirement

Timeline:

Starting August 1st, 2020, SharePoint 2010 workflows will be turned off for any newly created tenants.

Starting November 1st, 2020, Microsoft will remove the ability to run, or create, and or execute SharePoint 2010 workflows from existing tenants.

Action: Review and assess impact

Links MC217999

Linked Item Details MC217999 Title : Retiring SharePoint 2010 Workflows

MS Preparations You will want to notify your users, workflow developers and site owners. Update your user training and prepare your help desk.

For admins:

Use the "<https://docs.microsoft.com/en-us/sharepoint/dev/transform/modernize-scanner>"

SharePoint Modernization Scanner tool to scan your tenants for legacy workflow usage.

Review the guidance for "<https://aka.ms/sp-workflows-guidance>" migrating from classic workflows to Power Automate flows.

Review the "<https://flow.microsoft.com/en-us/>" Power Automate resources as a solution to legacy workflows.

Learn more

Detailed "<https://aka.ms/sp-workflows-support>" support article and with additional resources.

MS How does it affect me If your organization still uses SharePoint 2010 workflows, they will no longer function after November 1st, 2020. SharePoint 2013 workflows will remain supported, although turned off by default for new tenants starting November 1st, 2020. We recommend customers to move to Power Automate or other supported solutions.

As announced at Ignite, Compliance Manager (formerly Compliance Score) is moving out of public preview and the tasks you previously found in Compliance Manager (via the "<https://docs.microsoft.com/microsoft-365/compliance/get-started-with-service-trust-portal>" Service Trust Portal) are now housed within the Microsoft 365 compliance center under Compliance Manager. We announced the public preview of Compliance Score in November 2019.

This message is associated with Microsoft 365

Linked Item Details 60771 Title : Microsoft Compliance Manager general availability
60771 Description: Compliance Manager is the next generation of the existing Compliance Manager and Compliance Score solutions, which have been in public preview since November 2019. With this announcement, we are consolidating the functionality of these two solutions into one single solution, Compliance Manager, which sits in the Microsoft 365 compliance center. With Compliance Manager, you will benefit from intuitive end-to-end compliance management, a vast out-of-the-box assessment template library and built-in automation to scale your compliance across global, industrial and regional standards.

MS Preparations Learn more about the benefits of Compliance Manager and "<https://docs.microsoft.com/microsoft-365/compliance/compliance-manager>" review Compliance Manager technical documentation for setup and implementation guidance.
New licensing terms will be going into effect with general availability of the solution.
"<https://docs.microsoft.com/office365/servicedescriptions/microsoft-365-service-descriptions/microsoft-365-tenantlevel-services-licensing-guidance/microsoft-365-security-compliance-licensing-guidance#compliance-manager>" Review the Microsoft 365 licensing guidance for security and compliance to see what is available for your subscription level.
Visit the "<http://compliance.microsoft.com/>" Microsoft 365 compliance center to begin using the new Compliance Manager experience.

MS How does it affect me Compliance Manager consolidates the functionality of Compliance Score and Compliance Manager preview solutions. You can see your compliance score, add a template and assessment, and manage improvement actions.
You'll see some updates to your visual experience in the Microsoft 365 compliance center as these solutions are now housed within the same portal.
Any existing assessments created during the public preview of Compliance Score will continue to be available for use.

Compliance

additions from MC218031:

Make an assessment if confident or sensitive data might be exposed via Microsoft list to external parties.

Recommendations

additions from MC218031:

You should check in which way the new Microsoft lists feature product fits into your landscape especially in terms of task management another lists. Also, the Microsoft landscape in terms of Microsoft to do and planner should be evaluated.

Links

64162,MC218031

Config Options

additions from MC218031:

It is expected that the new Microsoft list feature can be disabled in the sub-SKU licensing part or via another switch if not needed.

Opportunities

additions from MC218031:

With Microsoft lists you can let you use is easily create lists with some logic without a TI or developer involvement.

Comments

additions from MC218031:

Microsoft Lists home (web) and mobile app – Create new lists, share and access recent and favorite lists in one location

Microsoft Teams + Microsoft Lists – Create a new list or embed an existing list directly in a Teams channel - combining lists with side-by-side conversation

Ready-made templates help you get started quickly – Jumpstart common scenarios with preconfigured structure, forms, views, and formatting

Customizable views, smart rules, and sharing keep everyone in sync

Description

additions from MC218031:

Track issues, assets, routines, contacts, inventory and more using customizable views and smart rules and alerts to keep everyone in sync.

MS How does it affect me

The Lists app in Microsoft Teams brings lists in team SharePoint sites into the collaboration and teamwork canvas of channels and facilitates conversations around list items. With this app, end users can work on their favorite lists from within Teams.

After adding the Lists app, users can carry out all functions of Microsoft Lists (home) and SharePoint lists, including adding/editing columns, filtering, sorting, formatting, and exporting to Excel.

Create a new list which will reside in the team site, and pin the list to the channel tab

Pin any existing list they have access to the (the or a) tab

Start a channel conversation about a list item after clicking the list to see a full stage view.

Lists created using the Lists app and Lists created in SharePoint are identical.

Image

Updated September 22, 2020: To ensure the best possible experience for our users, we are delaying some of our deployments to reduce the amount of change flowing into the services. Please see the updated roll-out timeline below

Our new pre-join experience makes it easier for users to select audio and video sources before joining a Teams meeting.

We are adding reactions to that allow Yammer users to react to conversations and comments. This feature is only available in the new Yammer.

This message is associated with Microsoft 365 "https://www.microsoft.com/microsoft-365/roadmap?filters=searchterms=67099" Roadmap ID 64931. When this will happen We will begin rolling out this out in mid-September and anticipate that the rollout will complete by the end of the month.

09/21/2020

Updated September 22, 2020: We have updated this post to ensure it is displaying as intended.

Office has introduced a modern and OAuth based authentication mechanism in Office 2016 and Microsoft 365 Apps for enterprise Win32 clients. Modern auth has been the default way of authentication in Office apps since the release of Office 365 ProPlus, more than 4 years ago. We however allowed customers to override this behavior by setting a regkey EnableADAL to 0 so that they could continue to use the legacy form of authentication against Microsoft 365 resources like SharePoint. This legacy form of authentication was powered by a library called IDCRL. It should be noted that the legacy form of authentication for Exchange Online is basic auth, which is different from IDCRL.

Our data suggests that less than 1% of commercial/organization users have overridden the default setting and are still using IDCRL for authentication purposes in Microsoft 365 Apps for enterprise. Modern auth is a more secure way of signing-in. It also allows additional security features like AAD conditional access using multi-factor authentication and device compliance and policies around them.

We are going to remove support for IDCRL library in newer builds of Microsoft 365 Apps for enterprise so that applications like Word, Excel, PowerPoint, OneNote will always use modern authentication with Microsoft 365 resources. This change will not impact Outlook, which uses basic authentication to communicate with Exchange when the EnableADAL regkey is set to 0.

Key points:

Major: Retirement

Timing:

Starting with Current Channel of Microsoft 365 Apps for enterprise version 2010

Semi-Annual Enterprise Channel (Preview) starting version 2102 in March 2021

Semi-Annual Enterprise Channel in July 2021.

Action: No action, this is for awareness

Docu to check Service Description, Automation / Scripts, Working instructions for IT Support, User Knowledge base

MS Preparations There is nothing you need to do as this notice is for awareness.

MS How does it affect me When the change is implemented, users may see a sign-in prompt on each impacted device.
Note: this affects only newer builds of Microsoft 365 Apps for enterprise and does NOT impact Office 2016 and 2019 perpetual products.

| Linked Item Details | <p>MC215678 Title : (Updated) New Feature: Seamlessly Share Personal Lists in To Do</p> <p>MC215678 Url : https://support.office.com/en-us/article/create-and-share-lists-4e5aeac6-8649-4813-aae5-2c2ddea2f292</p> <p>64658 Title : Microsoft To Do: Support for Sharing Personal Lists</p> <p>64658 Description: Microsoft To Do will now allow you to share lists from personal to work accounts.</p> |
| MS Preperations | <p>Once available, this feature will be enabled by default if you have not customized the setting for your tenant.</p> <p>You can manage the feature through Microsoft 365 admin center. You can review the setting in advance and ensure it is set to the experience appropriate for your organization. You can change it at any time; any changes can take up to 24 hours to go into effect.</p> <p>If a user joined a personal (MSA) list when the setting was enabled and you later disable it, the sync between the user and owner will stop within 24 hours. However, the user may continue to see the list for more than 24 hours.</p> <p>You might consider updating your training and documentation as appropriate.</p> <p>How to change the admin setting</p> <p>The admin setting will enable you to restrict people in your organization from joining lists owned by people outside your organization. However, whether or not the setting is enabled, enterprise users will not be able to share their lists with external personal accounts.</p> <p>Go To Microsoft 365 admin center</p> <p>Select Settings in the left hand pane</p> <p>Select Org settings</p> <p>Under Services select Microsoft To Do</p> <p>Select the correct setting in the right-hand fly-out that says “Allow your users to join and contribute to lists shared from outside the organization”</p> <p>Save the settings</p> |
| MS How does it affect me | <p>A personal Microsoft account (MSA) is an email address used to sign in to Microsoft services like Office 365, Xbox consoles, or Windows 10 PCs. Users can associate any email address as the user name for their MSA, including addresses from Outlook.com, Hotmail.com, Gmail, Yahoo!, or other providers.</p> <p>A work or school account is managed through Azure Active Directory (Azure AD) for a Microsoft 365 tenant.</p> <p>Microsoft To Do will support "https://support.microsoft.com/office/create-and-share-lists-4e5aeac6-8649-4813-aae5-2c2ddea2f292" list sharing between a personal account (MSA) and a work or school account (Azure AD).</p> <p>By default, users in your organization will be able to join, view, modify and add data to lists owned by an MSA.</p> <p>Users in your organization will not be able to share their lists with any account external to your tenant.</p> <p>Nor will users in your organization be able to join, view, modify or add data to lists owned by an external Azure AD account.</p> |

List creation from SharePoint sites will get a visual refresh and users will get the additional capability to create lists from eight built-in templates. These updates are already part of the Microsoft Lists app and Lists in Teams rollouts – we are bringing the same goodness to SharePoint sites too.

61687 Title : Excel: Office Scripts for task and workflow automation in Excel

61687 Description: In January, we released Office Scripts, a feature that enables users to automate their repetitive tasks in Excel Online, for public preview. The feature will now be available by default to all M365 Enterprise, Business, and EDU SKUs that have access to the O365 desktop apps.

61687 Url : <https://support.microsoft.com/en-us/office/introduction-to-office-scripts-in-excel-9f8e283d-adb8-4f13-a75b-a81c6baf163a>

MS Preperations

This feature ships default On. If you would like to disable this feature, you need to act by October 1, 2020.

If you would like to "https://docs.microsoft.com/microsoft-365/admin/manage/manage-office-scripts-settings" manage how Office Scripts is used in your organization, go to the M365 admin center, select Settings > Org settings. Then, select Office Scripts to view the Office Scripts admin controls. These controls will be available on August 31, 2020.

To block Office Scripts use in your tenant, deselect 'Let users automate their tasks in Office on the web'. This will hide the Automate tab for everyone in your tenant.

This feature is on by default. Should you disable and then wish to enable the feature, select 'Let users automate their tasks in Office on the web'. The global admin can choose to either allow all users access or create a specific group of users who have access to Office Scripts.

Once the 'Let users with access to Office Scripts share their scripts with others in the organization' checkbox is selected, the global admin can also choose whether or not a user can share scripts within an organization. No external sharing is allowed.

Note:

If your organization is not currently opted-in to the Office Scripts public preview experience, these controls will only affect Targeted Release users until the change is released to the rest of the organization.

Learn more: "https://docs.microsoft.com/microsoft-365/admin/manage/manage-office-scripts-settings" Manage Office Scripts settings

MS How does it affect me

"https://support.microsoft.com/office/introduction-to-office-scripts-in-excel-9f8e283d-adb8-4f13-a75b-a81c6baf163a" Office Scripts is an automation platform in Excel Online that allows users in your organization to create and record scripts to automate their repetitive workflows. With this change, the feature will be available by default for your organization unless you take action.

Microsoft Search: Q&A in Microsoft Word

68802

With the recent breakthroughs in deep learning techniques, you can now go beyond the common search term-based queries. The result is answers to your questions based on the document content. This opens a whole new way of finding knowledge. When you're looking at a water quality report, you can answer questions like "where does the city water originate from? How to reduce the amount of lead in water?"
