### Scope: Developer

This report contains items, where the 'check before' dates are in the current month and items with upcoming 'check before' dates for the next two months. This is an update-report containing only new or changed items during CW 39.

This is not intended for consumer use. Please respect the work cloudscout.one put into this and don't publish this and respect the copyright. Thank you.

#### What's next to do Major Items

#### **(Updated) Prevent/Fix: Updates to on-premises sync-enabled user contact numbers are no longer allowed**

**MC222474**

Updated September 24, 2020: We have updated this post with a Blog link for more details.

Starting near the beginning of October, updates to the mobilePhone property of on-premises sync-enabled users will no longer be allowed via Microsoft Graph, Azure AD Graph, or PowerShell. Updates to this property should instead be made in on-premises Active Directory and synced to the cloud. Updates to on-premises sync-enabled objects are not allowed because any changes to these objects are overwritten at the next Azure AD Connect sync cycle, since the source of authority of the objects is on-premises. "<https://docs.microsoft.com/en-us/graph/api/resources/user?view=graph-rest-beta#properties>" Learn more about which user properties are read-only.

---

List creation from SharePoint sites will get a visual refresh and users will get the additional capability to create lists from eight built-in templates. These updates are already part of the Microsoft Lists app and Lists in Teams rollouts – we are bringing the same goodness to SharePoint sites too.

Reminder: Retiring SharePoint 2010 Workflows

MC222628

As communicated in MC217999 (July '20), with the continued investment in Power Automate as the universal solution to workflow, Microsoft is retiring SharePoint 2010 workflows.

Additionally, we will begin implementing a new banner (example text below) that will be displayed on multiple workflow pages to remind users about the upcoming retirement.

"Starting November 1, 2020 6:00:00 AM, SharePoint 2010 workflows will be retired and users will no longer have the ability to run or create 2010 Workflows. The date displayed in the banner applies to your specific organization. For general dates and information about retirement, visit "<https://aka.ms/sp-workflows-support>" style="" https://aka.ms/sp-workflows-support"

Key Points:

Major: Retirement

Timeline:

Starting August 1st, 2020, SharePoint 2010 workflows will be turned off for any newly created tenants.

Starting November 1st, 2020, Microsoft will remove the ability to run, or create, and or execute SharePoint 2010 workflows from existing tenants.

Action: Review and assess impact

check before:09/29/2020

<b>Linked Item Details</b>	MC217999 Title : Retiring SharePoint 2010 Workflows
<b>MS Preparations</b>	<p>You will want to notify your users, workflow developers and site owners. Update your user training and prepare your help desk.</p> <p>For admins:</p> <p>Use the "<a href="https://docs.microsoft.com/en-us/sharepoint/dev/transform/modernize-scanner">https://docs.microsoft.com/en-us/sharepoint/dev/transform/modernize-scanner</a>" SharePoint Modernization Scanner tool to scan your tenants for legacy workflow usage.</p> <p>Review the guidance for "<a href="https://aka.ms/sp-workflows-guidance">https://aka.ms/sp-workflows-guidance</a>" migrating from classic workflows to Power Automate flows.</p> <p>Review the "<a href="https://flow.microsoft.com/en-us/">https://flow.microsoft.com/en-us/</a>" Power Automate resources as a solution to legacy workflows.</p> <p>Learn more</p> <p>Detailed "<a href="https://aka.ms/sp-workflows-support">https://aka.ms/sp-workflows-support</a>" support article and with additional resources.</p>
<b>MS How does it affect me</b>	If your organization still uses SharePoint 2010 workflows, they will no longer function after November 1st, 2020. SharePoint 2013 workflows will remain supported, although turned off by default for new tenants starting November 1st, 2020. We recommend customers to move to Power Automate or other supported solutions.

## New and improved Microsoft Graph connectors for Microsoft Search

57065

Microsoft Graph connectors provide a set of out-of-the-box search connectors to allow for you to connect Microsoft Search to disparate data sources outside of Microsoft 365. Microsoft Graph connectors will include the following connectors available within the Microsoft 365 Admin Center: Windows File Shares; ServiceNow, Microsoft SQL Server, Intranet websites, MediaWiki, Azure Data Lake Storage Gen2, Salesforce and an ingestion API.

## Quick Edit: fixed row height, row selection, and visual updates in SharePoint lists and document libraries

MC216574

In SharePoint document libraries and lists, we are releasing three new features in the Quick Edit experience.

Fixed row height, "<https://www.microsoft.com/microsoft-365/roadmap?filters=searchterms=64867>">Roadmap ID 64867

Row selection, "<https://www.microsoft.com/microsoft-365/roadmap?filters=searchterms=64868>">Roadmap ID 64868

Visual updates, "<https://www.microsoft.com/microsoft-365/roadmap?filters=searchterms=64871>">Roadmap ID 64871

When this will happen

These three features will roll out to Targeted Release customers from the end of June through mid-July.

These feature will roll to Standard Release customers from mid-July to mid-September.

## (Updated) New Riverbed CDN available in Microsoft Teams

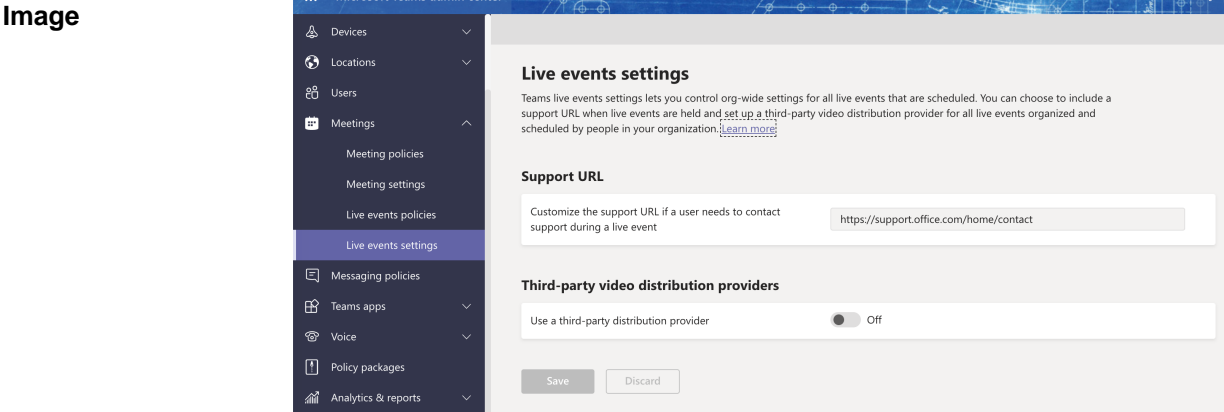

MC220515

Updated September 22, 2020: We have updated the timeline below.  
Thank you for your patience. Soon you will be able to use a new Enterprise Content Delivery Network (CDN), Riverbed, should you need a CDN for live events in Microsoft Teams.  
When this will happen  
We will begin rolling this out in early September and expect the rollout to be complete by late September (previously mid-September).

check before: **08/31/2020**

<b>Microsoft Teams: Meetings extensibility</b>		<b>68733</b>
		check before: <b>09/30/2020</b>
Teams meeting extensibility will enable developers to integrate their apps into the experience and construct of a meeting. New meeting surfaces, such as pre-/post- meeting tabs, in-meeting side panel, and content notifications will provide more areas to build richer interaction points for users. New meeting APIs will allow developers to enable their apps to be aware of meeting and participant context, such as roster, roles, and permissions.		Status: <b>In development</b>

We are changing how customized forms work inside SharePoint lists and libraries that will affect tenants using the SharePoint classic experience.		check before:	10/02/2020
Key points		Status:	
Timing: late October to late November		Created:	09/26/2020
Roll-out: tenant level		Product:	SharePoint
Control type: user control		Platform:	Online, World tenant
Action: review and assess by October 25, 2020		Scope:	UI, User, Developer
		Ring:	
		Type:	Feature update, User impact
		Tenant:	

**Docu to check** User Knowledge base

**MS Preparations** This change affects only SharePoint list and form customizations after October 25, 2020. Therefore, your users need to take action only if they create new classic form customizations after October 25, 2020.

If your users have a list or library forms customized using methods two or three above, they can ensure it continues to fall back to classic by setting an EditFormUrl or NewFormUrl property to point to the existing form URL.

Users can also configure an entire list or library to use classic mode using Advanced settings

Navigate to the list that you want to use classic mode.

Select Settings Gear button and then select List Settings

Select Advanced Settings

Change the "List experience" setting to "Classic experience."

Learn more

"<https://support.microsoft.com/office/differences-between-modern-and-classic-experiences-for-lists-and-libraries-30e1aab0-a5cc-4363-b7f2-09e2ae07d4dc>" Differences between modern and classic experiences for lists and libraries

**MS How does it affect me** Classic list and library forms support the following customizations:

Set the ContentType.EditFormUrl or ContentType.NewFormUrl properties to point to a custom form URL

Adding a Content editor web part or other web part to the form page

By adding a JSLink to one or more fields that appear on the form

Today, when one of these three customizations exists on a form inside a list or library that's configured to use the "<https://docs.microsoft.com/sharepoint/dev/transform/modernize-classic-sites>" SharePoint modern experience, those forms will continue to render in classic to ensure customizations are visible to all users.

With this change

All customizations in the above list that were in place before October 25, 2020 will continue to render in the classic SharePoint experience.

For customizations created after October 25, 2020: List item one customizations will continue to render in the classic experience

List items two and three customizations will no longer render in the classic experience by default

## Microsoft Teams: Power BI stage view in chat (Preview)

68763

Share a link to a report that is already is set to the view of the person that is sharing.
