Updated September 22, 2020: We have updated this post to ensure it is displaying as intended.

Office has introduced a modern and OAuth based authentication mechanism in Office 2016 and Microsoft 365 Apps for enterprise Win32 clients. Modern auth has been the default way of authentication in Office apps since the release of Office 365 ProPlus, more than 4 years ago. We however allowed customers to override this behavior by setting a regkey EnableADAL to 0 so that they could continue to use the legacy form of authentication against Microsoft 365 resources like SharePoint. This legacy form of authentication was powered by a library called IDCRL. It should be noted that the legacy form of authentication for Exchange Online is basic auth, which is different from IDCRL.

Our data suggests that less than 1% of commercial/organization users have overridden the default setting and are still using IDCRL for authentication purposes in Microsoft 365 Apps for enterprise. Modern auth is a more secure way of signing-in. It also allows additional security features like AAD conditional access using multi-factor authentication and device compliance and policies around them.

We are going to remove support for IDCRL library in newer builds of Microsoft 365 Apps for enterprise so that applications like Word, Excel, PowerPoint, OneNote will always use modern authentication with Microsoft 365 resources. This change will not impact Outlook, which uses basic authentication to communicate with Exchange when the EnableADAL regkey is set to 0.

Key points:

Major: Retirement

Timing:

Starting with Current Channel of Microsoft 365 Apps for enterprise version 2010

Semi-Annual Enterprise Channel (Preview) starting version 2102 in March 2021

Semi-Annual Enterprise Channel in July 2021.

Action: No action, this is for awareness

	Type:	User impact	Tenant:
<b>Docu to check</b>	Service Description, Automation / Scripts, Working instructions for IT Support, User Knowledge base		
<b>MS Preparations</b>	There is nothing you need to do as this notice is for awareness.		
<b>MS How does it affect me</b>	When the change is implemented, users may see a sign-in prompt on each impacted device. Note: this affects only newer builds of Microsoft 365 Apps for enterprise and does NOT impact Office 2016 and 2019 perpetual products.		

In MC215678 (June 2020), we announced that Microsoft To Do would support list sharing between personal Microsoft accounts and work or school accounts. We paused the rollout to incorporate your feedback. We are pleased to announce we are moving forward with this feature.

MS Preperations	<p>Once available, this feature will be enabled by default if you have not customized the setting for your tenant.</p> <p>You can manage the feature through Microsoft 365 admin center. You can review the setting in advance and ensure it is set to the experience appropriate for your organization. You can change it at any time; any changes can take up to 24 hours to go into effect.</p> <p>If a user joined a personal (MSA) list when the setting was enabled and you later disable it, the sync between the user and owner will stop within 24 hours. However, the user may continue to see the list for more than 24 hours.</p> <p>You might consider updating your training and documentation as appropriate.</p> <p>How to change the admin setting</p> <p>The admin setting will enable you to restrict people in your organization from joining lists owned by people outside your organization. However, whether or not the setting is enabled, enterprise users will not be able to share their lists with external personal accounts.</p> <p>Go To Microsoft 365 admin center</p> <p>Select Settings in the left hand pane</p> <p>Select Org settings</p> <p>Under Services select Microsoft To Do</p> <p>Select the correct setting in the right-hand fly-out that says “Allow your users to join and contribute to lists shared from outside the organization”</p> <p>Save the settings</p>
MS How does it affect me	<p>A personal Microsoft account (MSA) is an email address used to sign in to Microsoft services like Office 365, Xbox consoles, or Windows 10 PCs. Users can associate any email address as the user name for their MSA, including addresses from Outlook.com, Hotmail.com, Gmail, Yahoo!, or other providers.</p> <p>A work or school account is managed through Azure Active Directory (Azure AD) for a Microsoft 365 tenant.</p> <p>Microsoft To Do will support "<a href="https://support.microsoft.com/office/create-and-share-lists-4e5aeac6-8649-4813-aae5-2c2ddea2f292">https://support.microsoft.com/office/create-and-share-lists-4e5aeac6-8649-4813-aae5-2c2ddea2f292</a>" list sharing between a personal account (MSA) and a work or school account (Azure AD).</p> <p>By default, users in your organization will be able to join, view, modify and add data to lists owned by an MSA.</p> <p>Users in your organization will not be able to share their lists with any account external to your tenant.</p> <p>Nor will users in your organization be able to join, view, modify or add data to lists owned by an external Azure AD account.</p>

**(Updated) New Feature: Poll added to Outlook**

**MC205124**

Updated July 8, 2020: To ensure the proper experience we are adjusting the roll-out plan. The rollout for Outlook for the web and Outlook for Mac have completed. The rollout for Outlook for windows has begun and we expect it to be complete in mid-August. We apologize for any inconvenience. Your end users will no longer need to download the Quick Poll add-in from the store and manually install it in Outlook to create a poll after we pre-install the Poll add-in.

The rollout for Outlook on the web (desktop) began the end of May (was late April) and will be completed by mid-June (was end of May). Complete

The rollout for Outlook for Mac will begin in early June and be completed by the end of June. Complete

The rollout for Outlook for Windows has begun and will be completed by mid-August.

Outlook mobile: S/MIME improvements and delegate permissions

MC220427

For Outlook mobile clients, Microsoft is adding automatic signing and automatic message encryption using Secure Multipurpose Internet Mail extensions (S/MIME) as well as providing end user options to extend delegate mailbox permissions.

These updates are related to Microsoft 365 roadmap IDs

"<https://www.microsoft.com/microsoft-365/roadmap?filters=searchterms=67271>" 67271,

"<https://www.microsoft.com/microsoft-365/roadmap?filters=searchterms=67272>" 67272 (S/MIME) and

"<https://www.microsoft.com/microsoft-365/roadmap?filters=searchterms=67273>" 67273,

"<https://www.microsoft.com/microsoft-365/roadmap?filters=searchterms=67274>" 67274 (delegate permissions).

When this will happen

Rollout for auto sign and auto encrypt with S/MIME will begin at the end of August and be complete by the end of September.

Rollout for delegate mailbox permissions for end users will begin in early September and be complete by the end of September.

<b>Linked Item Details</b>	<p>67271 Title : Outlook for iOS: Automatic signing and encryption</p> <p>67271 Description: User setting to enable all messages to be automatically signed and encrypted using Secure Mobile Internet Mail extensions (S/MIME).</p> <p>67272 Title : Outlook for Android: Automatic signing and encryption</p> <p>67272 Description: User setting to enable all messages to be automatically signed and encrypted using Secure Mobile Internet Mail extensions (S/MIME).</p> <p>67273 Title : Outlook for Android: End user options for Delegate permissions</p> <p>67273 Description: You can extend permissions to have your delegate manage email and calendar events on your behalf by granting permission to read, create, change or delete items in your folders. Colleagues who have delegate permissions can add a Delegate Mailbox account to Outlook for Android.</p> <p>67274 Title : Outlook for iOS: End user options to extend Delegate Permissions</p> <p>67274 Description: You can extend permissions to have your delegate manage email and calendar events on your behalf by granting permission to read, create, change or delete items in your folders. Colleagues who have delegate permissions can add a Delegate Mailbox account to Outlook for iOS.</p>
<b>MS Preperations</b>	<p>The S/MIME user settings ship default Off.</p> <p>Administrators can use their mobile device management solution to require always sign and/or always encrypt with an app configuration policy on devices that are either enrolled or not enrolled. Microsoft Intune will include this option at the at the end of September.</p> <p>You might want to update user documentation and training.</p>
<b>MS How does it affect me</b>	<p>For organizations that use S/MIME for added security for email, this release allows users to set the S/MIME setting to “Always sign” and / or “Always encrypt”.</p> <p>After a user enables this setting, they will no longer have to manually set each email to be signed and encrypted.</p> <p>Valid S/MIME certificates are required to send signed and encrypted emails.</p> <p>Outlook mobile users can now grant delegate inbox permissions from within Outlook for iOS and Android.</p> <p>Users can set a delegate mailbox in order to allow others to take actions on their behalf.</p> <p>This release also adds the ability for users that have been granted folder level permissions from other Outlook endpoints to view those folders in Outlook mobile.</p> <p>These enhancements now complete our offering with shared and delegate mailbox scenarios. Organizations can enable access to another person’s mailbox using FullAccess permissions or users can grant others access to their mailboxes using Delegate permissions.</p>

**(Udpated) Outlook for Mac: Preview toggle of new experience in Insider Slow** **MC219576**

Updated September 1, 2020: This message has been updated to ensure it is displaying as intended. There are no changes to the content.

We are releasing the ability to preview the new Outlook for Mac for all Insider Slow users via a toggle that will be turned off by default. Insider Slow users can turn on the “New Outlook” toggle located at the top right of the Outlook window and experience all of the updates. They can switch quickly between the new Outlook for Mac experience and the current version in production.

Note: If your organization does not use Outlook for Mac or users are not part of Insiders Slow you can disregard this message.

The new Outlook for Mac experience has been updated to enhance performance and elevate productivity, is powered by the Microsoft Cloud, and connects using Microsoft sync technology. It brings updates across Mail, Search, and Calendar experiences that are designed for simplicity, reliability, and customization. The updated experience is carefully crafted and specifically designed with the power of Microsoft Services to provide suggestions and insights that are relevant to you, and simplicity to enable you to customize the experience.

This message is associated with Microsoft 365 RoadmapID

"<https://www.microsoft.com/microsoft-365/roadmap?filters=featureid=27287>" 27287

When this will happen

This will be available beginning on July 30, 2020.

<b>Docu to check</b>	Working instructions for IT Support
<b>Linked Item Details</b>	<p>66185 Title : Advanced eDiscovery: Supporting linked content from OneDrive and SharePoint Online (modern attachments)</p> <p>66185 Description: To help streamline discovery of linked content, Advanced eDiscovery natively groups linked content from OneDrive and SharePoint Online in the same family as the original Outlook email or Teams and Yammer chat message—streamlining the process of collecting, reviewing, and exporting the related content without additional configuration.</p>
<b>MS Preperations</b>	<p>Ask the Advanced eDiscovery manager in your organization to review this new functionality in a pre-production tenant and to determine how your organization might use this enhanced document retrieval in its investigations.</p> <p>Learn more:</p> <p>"<a href="https://docs.microsoft.com/microsoft-365/compliance/add-data-to-review-set#define-options-to-scope-your-collection-for-review">https://docs.microsoft.com/microsoft-365/compliance/add-data-to-review-set#define-options-to-scope-your-collection-for-review</a>" Define options to scope your collection for review</p> <p>"<a href="https://techcommunity.microsoft.com/t5/microsoft-security-and/improving-ediscovery-workflows-and-enhancing-your-forensic/ba-p/1696658">https://techcommunity.microsoft.com/t5/microsoft-security-and/improving-ediscovery-workflows-and-enhancing-your-forensic/ba-p/1696658</a>" Improving eDiscovery workflows and enhancing your forensic investigations</p>
<b>MS How does it affect me</b>	<p>Advanced eDiscovery in Microsoft 365 provides an end-to-end workflow to preserve, collect, review, analyze, and export data that's responsive to your organization's internal and external investigations.</p> <p>When Advanced eDiscovery administrators and managers use the Search tool to identify relevant documents, they can add those search results to a review set.</p> <p>Exchange 2016 introduced document collaboration that allowed on-premises users to integrate attachments stored on OD/SPO directly into email sent from Outlook on the web. Document collaboration is now supported by all Outlook clients. Rather than attach a file to an email, users insert a link to a file that is stored in OD/SPO. This feature is often called modern attachments, and it reduces storage demands on the Exchange server. However, because these files are stored outside of the Exchange server, until now they were not included in a collection and review set. Your Advanced eDiscovery team now has three options for collecting the results of a search into a review set (pre-existing or new):</p> <p>Conversational review set (beta) Select this to see email and chat enabled as threaded conversations.</p> <p>Enable retrieval for modern attachment Select this to review documents referenced in Outlook as a modern attachment (a link to a SPO/ODB source) as well as any SPO/ODB documents that are included as a link in Outlook or Teams.</p> <p>Include versions from SharePointSelect this to make a copy of all versions of a SharePoint file per the version limits and search parameters of the collection.</p>
