MS How does it affect me

The Lists app in Microsoft Teams brings lists in team SharePoint sites into the collaboration and teamwork canvas of channels and facilitates conversations around list items. With this app, end users can work on their favorite lists from within Teams.

After adding the Lists app, users can carry out all functions of Microsoft Lists (home) and SharePoint lists, including adding/editing columns, filtering, sorting, formatting, and exporting to Excel.

Create a new list which will reside in the team site, and pin the list to the channel tab

Pin any existing list they have access to the (the or a) tab

Start a channel conversation about a list item after clicking the list to see a full stage view.

Lists created using the Lists app and Lists created in SharePoint are identical.

(Updated) New Microsoft Teams meeting pre-join experience

MC220785

Updated September 22, 2020: To ensure the best possible experience for our users, we are delaying some of our deployments to reduce the amount of change flowing into the services. Please see the updated roll-out timeline below

Our new pre-join experience makes it easier for users to select audio and video sources before joining a Teams meeting.

MS Preperations You might want to update your training material and any other help docs.

MS How does it affect me The new pre-join experience retains the video toggle underneath the preview window and adds quick and clear access to "https://www.microsoft.com/en-us/microsoft-365/blog/2020/06/12/custom-backgrounds-microsoft-teams-video-meetings-fun-comfortable-personal/" background filters. All the available Audio options are now clearly detailed to the right of the preview window with the option to configure mic status, speaker volume, devices and ability to add a Teams meeting room.

List creation from SharePoint sites will get a visual refresh and users will get the additional capability to create lists from eight built-in templates. These updates are already part of the Microsoft Lists app and Lists in Teams rollouts – we are bringing the same goodness to SharePoint sites too.

Timing: Early October (October 5, 2020) – You can enable the Teams Meeting policy to have meeting recordings saved to OneDrive and SharePoint instead of Microsoft Stream (Classic)

End of October (October 31, 2020) – Meeting recordings in OneDrive and SharePoint will have support for English captions via the Teams transcription feature.

Early to mid-November (Rolling out between November 1 -15 , 2020) – All new Teams meeting recordings will be saved to OneDrive and SharePoint unless you delay this change by modifying your organization's Teams Meeting policies and explicitly setting them to "Stream"

Q1 2021 – No new meeting recordings can be saved to Microsoft Stream (Classic); all customers will automatically have meeting recordings saved to OneDrive and SharePoint even if they've changed their Teams meeting policies to Stream"

Advanced Audit: optional 10 year audit log retention add-on

68805

To help meet rigorous regulatory and internal compliance obligations or conduct longer running investigations, organizations can now add 10-year audit log retention to Advanced Audit. Once enabled, you can access the logs in the Microsoft 365 compliance center or through the Office 365 Management Activity API. The events will also soon be accessible across Microsoft 365 compliance solutions. 10-year audit log retention is generally available and E5 customers can try the feature today for a limited time at no additional cost. An add-on will be required from early 2021 to access this capability

MS How does it affect me	<p>Advanced eDiscovery in Microsoft 365 provides an end-to-end workflow to preserve, collect, review, analyze, and export data that's responsive to your organization's internal and external investigations.</p> <p>When Advanced eDiscovery administrators and managers use the Search tool to identify relevant documents, they can add those search results to a review set.</p> <p>Exchange 2016 introduced document collaboration that allowed on-premises users to integrate attachments stored on OD/SPO directly into email sent from Outlook on the web. Document collaboration is now supported by all Outlook clients. Rather than attach a file to an email, users insert a link to a file that is stored in OD/SPO. This feature is often called modern attachments, and it reduces storage demands on the Exchange server. However, because these files are stored outside of the Exchange server, until now they were not included in a collection and review set. Your Advanced eDiscovery team now has three options for collecting the results of a search into a review set (pre-existing or new):</p> <p>Conversational review set (beta) Select this to see email and chat enabled as threaded conversations.</p> <p>Enable retrieval for modern attachment Select this to review documents referenced in Outlook as a modern attachment (a link to a SPO/ODB source) as well as any SPO/ODB documents that are included as a link in Outlook or Teams.</p> <p>Include versions from SharePointSelect this to make a copy of all versions of a SharePoint file per the version limits and search parameters of the collection.</p>
