Introducing the Lists app in Teams

MC220295

We are pleased to launch the Lists app in Microsoft Teams for all Teams clients. This "<https://techcommunity.microsoft.com/t5/microsoft-365-blog/announcing-microsoft-lists-your-smart-information-tracking-app/ba-p/1372233>" feature is related to Microsoft 365 Lists which is accessible via Lists home (MC218031, July 7, 2020).

Key points

Microsoft 365 "<https://www.microsoft.com/microsoft-365/roadmap?filters=&searchterms=64162>" Roadmap ID 64162

Timing: early September and complete by mid-October 2020

Roll-out: tenant level

Control type: Teams admin control

Action: Review and assess

Compliance

additions from MC218031:

Make an assessment if confident or sensitive data might be exposed via Microsoft list to external parties.

Recommendations

additions from MC218031:

You should check in which way the new Microsoft lists feature product fits into your landscape especially in terms of task management another lists. Also, the Microsoft landscape in terms of Microsoft to do and planner should be evaluated.

Links

64162,MC218031

Config Options

additions from MC218031:

It is expected that the new Microsoft list feature can be disabled in the sub-SKU licensing part or via another switch if not needed.

Opportunities

additions from MC218031:

With Microsoft lists you can let you use is easily create lists with some logic without a TI or developer involvement.

Comments

additions from MC218031:

Microsoft Lists home (web) and mobile app – Create new lists, share and access recent and favorite lists in one location

Microsoft Teams + Microsoft Lists – Create a new list or embed an existing list directly in a Teams channel - combining lists with side-by-side conversation

Ready-made templates help you get started quickly – Jumpstart common scenarios with preconfigured structure, forms, views, and formatting

Customizable views, smart rules, and sharing keep everyone in sync

Description

additions from MC218031:

Track issues, assets, routines, contacts, inventory and more using customizable views and smart rules and alerts to keep everyone in sync.

MC218031 Title : (Updated) Introducing Microsoft Lists home (web)

MS Preperations

This feature ships default ON; Lists is pre-installed for all Teams users and is available directly in the tab gallery of every team and channel.

Teams admins can control the availability of the app using

"<https://docs.microsoft.com/microsoftteams/teams-app-permission-policies>" app permission policies.

Consider notifying your end users about the availability of the Lists App and update your end user training and documentation should you enable this for your tenant.

MS How does it affect me

The Lists app in Microsoft Teams brings lists in team SharePoint sites into the collaboration and teamwork canvas of channels and facilitates conversations around list items. With this app, end users can work on their favorite lists from within Teams.

After adding the Lists app, users can carry out all functions of Microsoft Lists (home) and SharePoint lists, including adding/editing columns, filtering, sorting, formatting, and exporting to Excel.

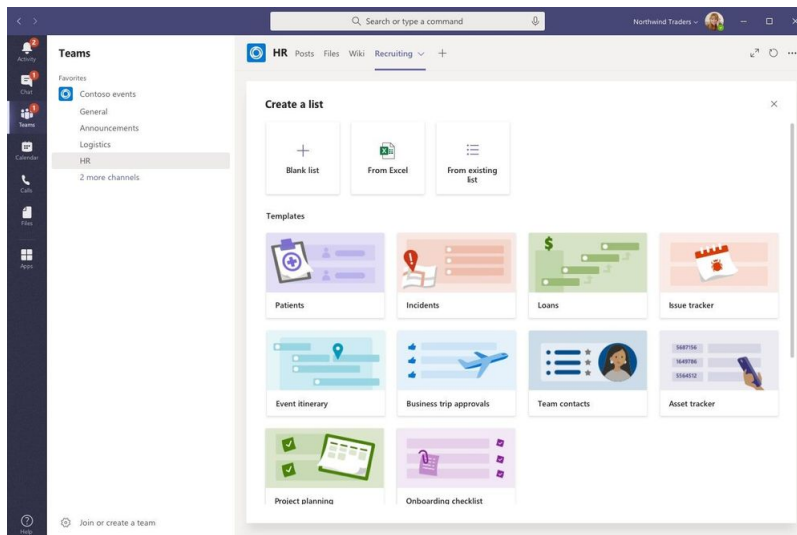

Create a new list which will reside in the team site, and pin the list to the channel tab

Pin any existing list they have access to the (the or a) tab

Start a channel conversation about a list item after clicking the list to see a full stage view.

Lists created using the Lists app and Lists created in SharePoint are identical.

Updated September 22, 2020: We have updated this post to ensure it is displaying as intended.

Office has introduced a modern and OAuth based authentication mechanism in Office 2016 and Microsoft 365 Apps for enterprise Win32 clients. Modern auth has been the default way of authentication in Office apps since the release of Office 365 ProPlus, more than 4 years ago. We however allowed customers to override this behavior by setting a regkey EnableADAL to 0 so that they could continue to use the legacy form of authentication against Microsoft 365 resources like SharePoint. This legacy form of authentication was powered by a library called IDCRL. It should be noted that the legacy form of authentication for Exchange Online is basic auth, which is different from IDCRL.

Our data suggests that less than 1% of commercial/organization users have overridden the default setting and are still using IDCRL for authentication purposes in Microsoft 365 Apps for enterprise. Modern auth is a more secure way of signing-in. It also allows additional security features like AAD conditional access using multi-factor authentication and device compliance and policies around them.

We are going to remove support for IDCRL library in newer builds of Microsoft 365 Apps for enterprise so that applications like Word, Excel, PowerPoint, OneNote will always use modern authentication with Microsoft 365 resources. This change will not impact Outlook, which uses basic authentication to communicate with Exchange when the EnableADAL regkey is set to 0.

Key points:

Major: Retirement

Timing:

Starting with Current Channel of Microsoft 365 Apps for enterprise version 2010

Semi-Annual Enterprise Channel (Preview) starting version 2102 in March 2021

Semi-Annual Enterprise Channel in July 2021.

Action: No action, this is for awareness

	Type:	User impact	Tenant:
Docu to check	Service Description, Automation / Scripts, Working instructions for IT Support, User Knowledge base		
MS Preparations	There is nothing you need to do as this notice is for awareness.		
MS How does it affect me	When the change is implemented, users may see a sign-in prompt on each impacted device. Note: this affects only newer builds of Microsoft 365 Apps for enterprise and does NOT impact Office 2016 and 2019 perpetual products.		

List creation from SharePoint sites will get a visual refresh and users will get the additional capability to create lists from eight built-in templates. These updates are already part of the Microsoft Lists app and Lists in Teams rollouts – we are bringing the same goodness to SharePoint sites too.

Reminder: Retiring SharePoint 2010 Workflows

MC222628

As communicated in MC217999 (July '20), with the continued investment in Power Automate as the universal solution to workflow, Microsoft is retiring SharePoint 2010 workflows.

Additionally, we will begin implementing a new banner (example text below) that will be displayed on multiple workflow pages to remind users about the upcoming retirement.

"Starting November 1, 2020 6:00:00 AM, SharePoint 2010 workflows will be retired and users will no longer have the ability to run or create 2010 Workflows. The date displayed in the banner applies to your specific organization. For general dates and information about retirement, visit ["https://aka.ms/sp-workflows-support" style="" https://aka.ms/sp-workflows-support"](https://aka.ms/sp-workflows-support)

Key Points:

Major: Retirement

Timeline:

Starting August 1st, 2020, SharePoint 2010 workflows will be turned off for any newly created tenants.

Starting November 1st, 2020, Microsoft will remove the ability to run, or create, and or execute SharePoint 2010 workflows from existing tenants.

Action: Review and assess impact

Linked Item Details	MC217999 Title : Retiring SharePoint 2010 Workflows
MS Preparations	<p>You will want to notify your users, workflow developers and site owners. Update your user training and prepare your help desk.</p> <p>For admins:</p> <p>Use the "https://docs.microsoft.com/en-us/sharepoint/dev/transform/modernize-scanner" SharePoint Modernization Scanner tool to scan your tenants for legacy workflow usage.</p> <p>Review the guidance for "https://aka.ms/sp-workflows-guidance" migrating from classic workflows to Power Automate flows.</p> <p>Review the "https://flow.microsoft.com/en-us/" Power Automate resources as a solution to legacy workflows.</p> <p>Learn more</p> <p>Detailed "https://aka.ms/sp-workflows-support" support article and with additional resources.</p>
MS How does it affect me	If your organization still uses SharePoint 2010 workflows, they will no longer function after November 1st, 2020. SharePoint 2013 workflows will remain supported, although turned off by default for new tenants starting November 1st, 2020. We recommend customers to move to Power Automate or other supported solutions.

Microsoft 365 compliance center: Auto-apply retention labels leveraging document understanding		68690
Easily assign a retention label created in the Microsoft 365 compliance center to a document understanding model that you created, leveraging the document classification in Project Cortex for dual purposes— business processes and compliance.		<p>check before: 09/30/2020</p> <p>Status: In development</p> <p>Created: 09/15/2020</p> <p>Product: Microsoft Compliance center, SharePoint</p> <p>Platform: World tenant, Online, Web</p> <p>Scope: Compliance, AI, Administration, Licensing</p> <p>Ring: Preview</p> <p>Type: New feature, Admin impact</p> <p>Tenant:</p>

We're changing the storage for new Teams meeting recordings to be stored on, and served from, OneDrive and SharePoint (ODSP) - instead of Microsoft Stream (Classic). Customers are able to opt in, opt out, or take no action with regard to these changes.

This change will apply to customers who either opt in or take no action following this announcement.

Key points:

Microsoft 365 Roadmap ID: "<https://www.microsoft.com/microsoft-365/roadmap?filters=featureid=67138>" target="_blank" style="background-color: rgb(255, 255, 255); font-family: sans-serif; font-weight: 400;">67138

Timing: Early October (October 5, 2020) – You can enable the Teams Meeting policy to have meeting recordings saved to OneDrive and SharePoint instead of Microsoft Stream (Classic)

End of October (October 31, 2020) – Meeting recordings in OneDrive and SharePoint will have support for English captions via the Teams transcription feature.

Early to mid-November (Rolling out between November 1 -15 , 2020) – All new Teams meeting recordings will be saved to OneDrive and SharePoint unless you delay this change by modifying your organization's Teams Meeting policies and explicitly setting them to "Stream"

Q1 2021 – No new meeting recordings can be saved to Microsoft Stream (Classic); all customers will automatically have meeting recordings saved to OneDrive and SharePoint even if they've changed their Teams meeting policies to Stream"

Advanced eDiscovery now supports linked content (modern attachments) from OneDrive and SharePoint Online

MC222627

Advanced eDiscovery will now support linked content (modern attachments) from OneDrive and SharePoint Online (OD/SPO). Linked content can be shared in Teams and Yammer chat messages and Outlook emails.

This message is associated with Microsoft 365"<https://www.microsoft.com/microsoft-365/roadmap?filters=searchterms=66185>" Roadmap ID 66185. When this will happenWe will begin rolling this out in late September and expect the rollout to be complete by the end of October.

Linked Item Details	<p>66185 Title : Advanced eDiscovery: Supporting linked content from OneDrive and SharePoint Online (modern attachments)</p> <p>66185 Description: To help streamline discovery of linked content, Advanced eDiscovery natively groups linked content from OneDrive and SharePoint Online in the same family as the original Outlook email or Teams and Yammer chat message—streamlining the process of collecting, reviewing, and exporting the related content without additional configuration.</p>
MS Preperations	<p>Ask the Advanced eDiscovery manager in your organization to review this new functionality in a pre-production tenant and to determine how your organization might use this enhanced document retrieval in its investigations.</p> <p>Learn more:</p> <p>"https://docs.microsoft.com/microsoft-365/compliance/add-data-to-review-set#define-options-to-scope-your-collection-for-review" Define options to scope your collection for review</p> <p>"https://techcommunity.microsoft.com/t5/microsoft-security-and/improving-ediscovery-workflows-and-enhancing-your-forensic/ba-p/1696658" Improving eDiscovery workflows and enhancing your forensic investigations</p>
MS How does it affect me	<p>Advanced eDiscovery in Microsoft 365 provides an end-to-end workflow to preserve, collect, review, analyze, and export data that's responsive to your organization's internal and external investigations.</p> <p>When Advanced eDiscovery administrators and managers use the Search tool to identify relevant documents, they can add those search results to a review set.</p> <p>Exchange 2016 introduced document collaboration that allowed on-premises users to integrate attachments stored on OD/SPO directly into email sent from Outlook on the web. Document collaboration is now supported by all Outlook clients. Rather than attach a file to an email, users insert a link to a file that is stored in OD/SPO. This feature is often called modern attachments, and it reduces storage demands on the Exchange server. However, because these files are stored outside of the Exchange server, until now they were not included in a collection and review set. Your Advanced eDiscovery team now has three options for collecting the results of a search into a review set (pre-existing or new):</p> <p>Conversational review set (beta) Select this to see email and chat enabled as threaded conversations.</p> <p>Enable retrieval for modern attachment Select this to review documents referenced in Outlook as a modern attachment (a link to a SPO/ODB source) as well as any SPO/ODB documents that are included as a link in Outlook or Teams.</p> <p>Include versions from SharePointSelect this to make a copy of all versions of a SharePoint file per the version limits and search parameters of the collection.</p>

SharePoint: My Feed web part

67148

Make your page or site in SharePoint more dynamic and relevant to individual users by adding the My feed web part. The My feed web part will show a mix of content from across Microsoft 365, based on what's likely to be most relevant to the current user at any given time.

Microsoft Information Protection: Auto-classification with sensitivity labels in SPO, EXO, OneDrive for gov clouds

67125

Auto-classification with sensitivity labels in OneDrive, SharePoint Online, and Exchange Online will soon be available in GCC and GCC-High environments. Sensitivity labels are central to Microsoft Information Protection, enabling you to label important content to associate it with protection policies and actions like encryption and visual marking. With this release, you can start using sensitivity labels at scale for documents stored on OneDrive and SharePoint Online, and for emails in transit in Exchange Online automatically without manual user input.

Records Management: Regulatory record labels

MC222757

As announced at Ignite, we're introducing the public preview of regulatory record labels which further enhance immutability of labeled items. These new labels prevent metadata changes, records movements, and records versioning. They also block users and administrators from removing a label once applied.

Compliance

additions from 64167:

Make an assessment if confident or sensitive data might be exposed via Microsoft Lists to external parties.

Recommendations

additions from 64167:

You should check in which way the new Microsoft lists feature product fits into your landscape especially in terms of task management another lists. Also, the Microsoft landscape in terms of Microsoft to do and planner should be evaluated.

Links

64167

Config Options

additions from 64167:

It is expected that the new Microsoft Lists feature can be disabled in the sub-SKU licensing part or via another switch if not needed.

Opportunities

additions from 64167:

With Microsoft Lists you can let you use is easily create lists with some logic without a IT or developer involvement.

Comments

additions from 64167:

Microsoft Lists home (web) and mobile app – Create new lists, share and access recent and favorite lists in one location

Microsoft Teams + Microsoft Lists – Create a new list or embed an existing list directly in a Teams channel - combining lists with side-by-side conversation

Ready-made templates help you get started quickly – Jumpstart common scenarios with preconfigured structure, forms, views, and formatting

Customizable views, smart rules, and sharing keep everyone in sync

Description

additions from 64167:

Track issues, assets, routines, contacts, inventory and more using customizable views and smart rules and alerts to keep everyone in sync.

Docu to check User Knowledge base

MS Preparations This change affects only SharePoint list and form customizations after October 25, 2020. Therefore, your users need to take action only if they create new classic form customizations after October 25, 2020.

If your users have a list or library forms customized using methods two or three above, they can ensure it continues to fall back to classic by setting an EditFormUrl or NewFormUrl property to point to the existing form URL.

Users can also configure an entire list or library to use classic mode using Advanced settings

Navigate to the list that you want to use classic mode.

Select Settings Gear button and then select List Settings

Select Advanced Settings

Change the "List experience" setting to "Classic experience."

Learn more

"<https://support.microsoft.com/office/differences-between-modern-and-classic-experiences-for-lists-and-libraries-30e1aab0-a5cc-4363-b7f2-09e2ae07d4dc>" Differences between modern and classic experiences for lists and libraries

MS How does it affect me Classic list and library forms support the following customizations:

Set the ContentType.EditFormUrl or ContentType.NewFormUrl properties to point to a custom form URL

Adding a Content editor web part or other web part to the form page

By adding a JSLink to one or more fields that appear on the form

Today, when one of these three customizations exists on a form inside a list or library that's configured to use the "<https://docs.microsoft.com/sharepoint/dev/transform/modernize-classic-sites>" SharePoint modern experience, those forms will continue to render in classic to ensure customizations are visible to all users.

With this change

All customizations in the above list that were in place before October 25, 2020 will continue to render in the classic SharePoint experience.

For customizations created after October 25, 2020:List item one customizations will continue to render in the classic experience

List items two and three customizations will no longer render in the classic experience by default

You'll have the ability to show page sections in an accordion view (collapsed or expanded) or as tabs. The accordion view will be collapsed by default, but can be set to show expanded.
