Updated September 22, 2020: We have updated this post to ensure it is displaying as intended.

Office has introduced a modern and OAuth based authentication mechanism in Office 2016 and Microsoft 365 Apps for enterprise Win32 clients. Modern auth has been the default way of authentication in Office apps since the release of Office 365 ProPlus, more than 4 years ago. We however allowed customers to override this behavior by setting a regkey EnableADAL to 0 so that they could continue to use the legacy form of authentication against Microsoft 365 resources like SharePoint. This legacy form of authentication was powered by a library called IDCRL. It should be noted that the legacy form of authentication for Exchange Online is basic auth, which is different from IDCRL.

Our data suggests that less than 1% of commercial/organization users have overridden the default setting and are still using IDCRL for authentication purposes in Microsoft 365 Apps for enterprise. Modern auth is a more secure way of signing-in. It also allows additional security features like AAD conditional access using multi-factor authentication and device compliance and policies around them.

We are going to remove support for IDCRL library in newer builds of Microsoft 365 Apps for enterprise so that applications like Word, Excel, PowerPoint, OneNote will always use modern authentication with Microsoft 365 resources. This change will not impact Outlook, which uses basic authentication to communicate with Exchange when the EnableADAL regkey is set to 0.

Key points:

Major: Retirement

Timing:

Starting with Current Channel of Microsoft 365 Apps for enterprise version 2010

Semi-Annual Enterprise Channel (Preview) starting version 2102 in March 2021

Semi-Annual Enterprise Channel in July 2021.

Action: No action, this is for awareness

Reminder: Change in Process to Contact Microsoft Defender ATP Support

MC222822

As originally announced in MC218778 (July '20) the process for opening support cases for Microsoft Defender ATP has changed with the availability of the new support widget. We completed rolling out the change in mid-September. Additionally, we wanted to provide additional guidance on which roles are needed to submit a Support request.

(Updated) Office Scripts to be enabled by default

MC221139

Updated September 18, 2020: We have updated the title to more accurately reflect the state of the change. Additionally, we have provided more details about the timeline. We apologize for any confusion. Thank you for your feedback.

In January, we released Office Scripts, a feature that enables users to automate their repetitive tasks in Excel Online, for public preview. We are now transitioning from public preview to making Office Scripts available by default for your organization.

Key points

Microsoft 365 "<https://www.microsoft.com/microsoft-365/roadmap?filters=searchterms=61687>" Roadmap ID 61687

Timing: The admin control is available now

Targeted release admin control enforcement has begun

Standard release admin control enforcement begins October 1, 2020

Roll-out: tenant level

Control type: admin control (available now)

Action: Standard release, review and assess by October 1, 2020

check before:	10/01/2020

Linked Item Details 61687 Title : Excel: Office Scripts for task and workflow automation in Excel
61687 Description: In January, we released Office Scripts, a feature that enables users to automate their repetitive tasks in Excel Online, for public preview. The feature will now be available by default to all M365 Enterprise, Business, and EDU SKUs that have access to the O365 desktop apps.
61687 Url : <https://support.microsoft.com/en-us/office/introduction-to-office-scripts-in-excel-9f9be283d-adb8-4f13-a75b-a81c6baf163a>

MS Preperations This feature ships default On. If you would like to disable this feature, you need to act by October 1, 2020.

If you would like to "https://docs.microsoft.com/microsoft-365/admin/manage/manage-office-scripts-settings" manage how Office Scripts is used in your organization, go to the M365 admin center, select Settings > Org settings. Then, select Office Scripts to view the Office Scripts admin controls. These controls will be available on August 31, 2020.

To block Office Scripts use in your tenant, deselect 'Let users automate their tasks in Office on the web'. This will hide the Automate tab for everyone in your tenant.

This feature is on by default. Should you disable and then wish to enable the feature, select 'Let users automate their tasks in Office on the web'. The global admin can choose to either allow all users access or create a specific group of users who have access to Office Scripts.

Once the 'Let users with access to Office Scripts share their scripts with others in the organization' checkbox is selected, the global admin can also choose whether or not a user can share scripts within an organization. No external sharing is allowed.

Note:

If your organization is not currently opted-in to the Office Scripts public preview experience, these controls will only affect Targeted Release users until the change is released to the rest of the organization.

Learn more: "https://docs.microsoft.com/microsoft-365/admin/manage/manage-office-scripts-settings" Manage Office Scripts settings

MS How does it affect me "https://support.microsoft.com/office/introduction-to-office-scripts-in-excel-9f9be283d-adb8-4f13-a75b-a81c6baf163a" Office Scripts is an automation platform in Excel Online that allows users in your organization to create and record scripts to automate their repetitive workflows. With this change, the feature will be available by default for your organization unless you take action.

We have recently updated the "<https://docs.microsoft.com/azure/active-directory/authentication/howto-mfa-mfasettings#remember-multi-factor-authentication>" target="_blank" style="">>remember Multi-Factor Authentication (MFA) on a trusted device feature to extend authentication for up to 365 days. You are receiving this email because you are currently using this setting within your tenant. However, you also have Azure Active Directory (Azure AD) Premium licenses, which allow you to use the "<https://docs.microsoft.com/azure/active-directory/conditional-access/howto-conditional-access-session-lifetime#user-sign-in-frequency>" Conditional Access – Sign-in Frequency policy that provides more flexibility for reauthentication settings.

When this will happen The extended duration for remember MFA on a trusted device and the Conditional Access sign-in frequency policy are available now.

Type: Admin impact, Feature update, User impact
 Tenant:

Docu to check Automation / Scripts, Working instructions for IT Support

MS Preparations To get started, review our "<https://docs.microsoft.com/azure/active-directory/authentication/concepts-azure-multi-factor-authentication-prompts-session-lifetime>" latest guidance on optimizing the reauthentication experience. Then review your tenant configuration. If you have enabled more than one setting in your tenant, we recommend using only the Conditional Access policies of "<https://docs.microsoft.com/azure/active-directory/conditional-access/howto-conditional-access-session-lifetime#user-sign-in-frequency>" user sign-in frequency or "<https://docs.microsoft.com/azure/active-directory/conditional-access/howto-conditional-access-session-lifetime#persistence-of-browsing-sessions>" persistent browser sessions. Review "<https://docs.microsoft.com/azure/active-directory/conditional-access/howto-conditional-access-session-lifetime>" Configure authentication session management with Conditional Access Review "<https://docs.microsoft.com/azure/active-directory/authentication/howto-mfa-mfasettings#remember-multi-factor-authentication>" Remember Multi-Factor Authentication on a trusted device setting

MS How does it affect me For the optimal user experience, we recommend using "<https://docs.microsoft.com/azure/active-directory/conditional-access/howto-conditional-access-session-lifetime#user-sign-in-frequency>" Conditional Access sign-in frequency to extend session lifetimes on trusted devices, locations, or low-risk sessions as an alternative to the remember MFA on a trusted device setting. If using remember MFA on a trusted device, be sure to extend the duration to 90 or more days.

Outlook for Mac: Delegation

68820

Delegate Access goes beyond just sharing access to your folders. Delegates are granted additional permissions, such as creating email messages or responding to meeting requests on your behalf.
