Updated September 22, 2020: We have updated this post to ensure it is displaying as intended.

Office has introduced a modern and OAuth based authentication mechanism in Office 2016 and Microsoft 365 Apps for enterprise Win32 clients. Modern auth has been the default way of authentication in Office apps since the release of Office 365 ProPlus, more than 4 years ago. We however allowed customers to override this behavior by setting a regkey EnableADAL to 0 so that they could continue to use the legacy form of authentication against Microsoft 365 resources like SharePoint. This legacy form of authentication was powered by a library called IDCRL. It should be noted that the legacy form of authentication for Exchange Online is basic auth, which is different from IDCRL.

Our data suggests that less than 1% of commercial/organization users have overridden the default setting and are still using IDCRL for authentication purposes in Microsoft 365 Apps for enterprise. Modern auth is a more secure way of signing-in. It also allows additional security features like AAD conditional access using multi-factor authentication and device compliance and policies around them.

We are going to remove support for IDCRL library in newer builds of Microsoft 365 Apps for enterprise so that applications like Word, Excel, PowerPoint, OneNote will always use modern authentication with Microsoft 365 resources. This change will not impact Outlook, which uses basic authentication to communicate with Exchange when the EnableADAL regkey is set to 0.

Key points:

Major: Retirement

Timing:

Starting with Current Channel of Microsoft 365 Apps for enterprise version 2010

Semi-Annual Enterprise Channel (Preview) starting version 2102 in March 2021

Semi-Annual Enterprise Channel in July 2021.

Action: No action, this is for awareness

Type:	User impact	Tenant:
-------	-------------	---------

Docu to check	Service Description, Automation / Scripts, Working instructions for IT Support, User Knowledge base
----------------------	---

MS Preperations	There is nothing you need to do as this notice is for awareness.
------------------------	--

MS How does it affect me	When the change is implemented, users may see a sign-in prompt on each impacted device. Note: this affects only newer builds of Microsoft 365 Apps for enterprise and does NOT impact Office 2016 and 2019 perpetual products.
---------------------------------	---

Reminder: Retirement of legacy eDiscovery tools

MC222624

As originally announced in MC200104 (January '20) we will be retiring legacy eDiscovery tools soon.

When this will happen

There are several key dates for this retirement and we're now approaching the October 1, 2020 milestone.

In-Place eDiscovery and Holds in the Exchange admin center (EAC)

July 1, 2020: You won't be able to create new searches and holds, but you can still run, edit, and delete existing searches at your own risk.

Microsoft Support will no longer provide assistance for In-Place eDiscovery Holds in the EAC.

October 1, 2020: The In-Place eDiscovery Holds functionality in the EAC will be placed in a read-only mode. This means you'll only be able to remove existing searches and holds.

*-MailboxSearch cmdlets

July 1, 2020: You won't be able to use the New-MailboxSearch cmdlet to create new In-Place eDiscovery searches and In-Place Holds, but you can still use the other cmdlets to run, edit, and delete existing searches and holds at your own risk. Microsoft Support will no longer provide assistance for these types of searches and holds.

October 1, 2020: As previously stated, the In-Place eDiscovery Holds functionality in the EAC will be placed in a read-only mode. This also means that you won't be able to use the New-MailboxSearch, Start-MailboxSearch, or Set-MailboxSearch cmdlets. You'll only be able to get and remove existing searches and holds.

For more information, please see "<https://docs.microsoft.com/en-us/microsoft-365/compliance/legacy-ediscovery-retirement?view=o365-worldwide>" Retirement of legacy eDiscovery tools.

MS Preparations

Migrate all usage to Microsoft 365 eDiscovery or appropriate alternatives. These are described at: "<https://docs.microsoft.com/en-us/microsoft-365/compliance/legacy-ediscovery-retirement>" Retirement of legacy eDiscovery tools. If you're interested in migrating existing In-Place eDiscovery searches and holds to the Microsoft 365 compliance center, please see "<https://docs.microsoft.com/en-us/microsoft-365/compliance/migrate-legacy-ediscovery-searches-and-holds?view=o365-worldwide>" Migrate legacy eDiscovery searches and holds to the Microsoft 365 compliance center.

MS How does it affect me

Any holds created by using In-Place eDiscovery Holds in the EAC (or by using the corresponding cmdlet) will continue to preserve data. In-Place eDiscovery searches and holds can be removed at any time.

Prevent/Fix: Shared mailboxes inaccessible due to license expired error

MC222773

A change was made to Exchange Online to correct the way unlicensed mailbox access is handled. This change may cause Shared mailboxes to be inaccessible due to a license expired error.

Note: If you are not experiencing the following license expired error you can safely disregard this message

"The mailbox isn't available. This may have occurred because the license for the mailbox has expired. To find out how to gain access to this mailbox again, contact the person who manages your email account."

Docu to check Working instructions for IT Support

MS Preparations If you are experiencing the error message that the license has expired and the mailbox is showing as a shared mailbox in both On-Prem AD and Azure AD but in Exchange Online it is not a shared mailbox, run the following cmdlet using "https://docs.microsoft.com/powershell/exchange/connect-to-exchange-online-powershell" Exchange Online PowerShell:
Set-Mailbox -Type Shared

MS How does it affect me This could cause delegates who are accessing shared mailboxes to no longer have access. This occurs because both On-Prem AD as well as Azure AD see the mailbox as Shared, but Exchange Online still sees the mailbox as a User mailbox.

What's next to do minor Items

Advanced Audit: optional 10 year audit log retention add-on

68805

To help meet rigorous regulatory and internal compliance obligations or conduct longer running investigations, organizations can now add 10-year audit log retention to Advanced Audit. Once enabled, you can access the logs in the Microsoft 365 compliance center or through the Office 365 Management Activity API. The events will also soon be accessible across Microsoft 365 compliance solutions. 10-year audit log retention is generally available and E5 customers can try the feature today for a limited time at no additional cost. An add-on will be required from early 2021 to access this capability

CAUTION New item - "Launched"**Advanced eDiscovery: First set of Graph APIs in Public Preview****68808**

The first set of Graph APIs that are available in public preview enables organizations to call the APIs to get a list of cases, read the properties of a case, and create, update, delete and retrieve information on the cases. Similar actions are available for your review set and review set queries. For example, you can automatically apply the auto generated query to filter out duplicate items, or you can automatically apply your own custom query to your review set.

Linked Item Details 67126 Title : Outlook: Outlook on the web - Suggested replies now available in Chinese (People's Republic of China)

67126 Description: Outlook on the web is adding support for suggested replies for conversations in Chinese (People's Republic of China) for customers with mailboxes in the Asia-Pacific (APAC) region.

MS Preperations You might consider updating your user documentation and training.

"<https://support.microsoft.com/office/use-intelligent-technology-in-outlook-on-the-web-and-outlook-com-24b30683-8340-4b69-b8ac-4193ec528a70>" Learn about suggested replies

"<https://support.microsoft.com/office/change-the-time-zone-and-language-settings-in-outlook-on-the-web-65239869-12e7-4a9d-bca1-76b0ad7ce273>" Learn how to check or update your language settings in Outlook on the web

MS How does it affect me Suggested replies are short email responses that "<https://support.microsoft.com/office/use-intelligent-technology-in-outlook-on-the-web-and-outlook-com-24b30683-8340-4b69-b8ac-4193ec528a70>" appear at the bottom of an email message. When your users receive a message in email that can be answered with a short response, Outlook suggests three responses that they can use to reply with a couple of clicks.

Outlook may suggest short responses to email messages when this rolls out to your tenant and (1) a user has a conversation in one of those languages; (2) their language setting in Outlook on the web is set to Chinese (People's Republic of China); and (3) their mailbox is located in the Asia-Pacific (APAC) region.

Advanced eDiscovery now supports linked content (modern attachments) from OneDrive and SharePoint Online

MC222627

Advanced eDiscovery will now support linked content (modern attachments) from OneDrive and SharePoint Online (OD/SPO). Linked content can be shared in Teams and Yammer chat messages and Outlook emails.

This message is associated with Microsoft 365 "<https://www.microsoft.com/microsoft-365/roadmap?filters=searchterms=66185>" Roadmap ID 66185.

When this will happen We will begin rolling this out in late September and expect the rollout to be complete by the end of October.

Docu to check	Working instructions for IT Support
Linked Item Details	<p>66185 Title : Advanced eDiscovery: Supporting linked content from OneDrive and SharePoint Online (modern attachments)</p> <p>66185 Description: To help streamline discovery of linked content, Advanced eDiscovery natively groups linked content from OneDrive and SharePoint Online in the same family as the original Outlook email or Teams and Yammer chat message—streamlining the process of collecting, reviewing, and exporting the related content without additional configuration.</p>
MS Preperations	<p>Ask the Advanced eDiscovery manager in your organization to review this new functionality in a pre-production tenant and to determine how your organization might use this enhanced document retrieval in its investigations.</p> <p>Learn more:</p> <p>"https://docs.microsoft.com/microsoft-365/compliance/add-data-to-review-set#define-options-to-scope-your-collection-for-review" Define options to scope your collection for review</p> <p>"https://techcommunity.microsoft.com/t5/microsoft-security-and/improving-ediscovery-workflows-and-enhancing-your-forensic/ba-p/1696658" Improving eDiscovery workflows and enhancing your forensic investigations</p>
MS How does it affect me	<p>Advanced eDiscovery in Microsoft 365 provides an end-to-end workflow to preserve, collect, review, analyze, and export data that's responsive to your organization's internal and external investigations.</p> <p>When Advanced eDiscovery administrators and managers use the Search tool to identify relevant documents, they can add those search results to a review set.</p> <p>Exchange 2016 introduced document collaboration that allowed on-premises users to integrate attachments stored on OD/SPO directly into email sent from Outlook on the web. Document collaboration is now supported by all Outlook clients. Rather than attach a file to an email, users insert a link to a file that is stored in OD/SPO. This feature is often called modern attachments, and it reduces storage demands on the Exchange server. However, because these files are stored outside of the Exchange server, until now they were not included in a collection and review set. Your Advanced eDiscovery team now has three options for collecting the results of a search into a review set (pre-existing or new):</p> <p>Conversational review set (beta) Select this to see email and chat enabled as threaded conversations.</p> <p>Enable retrieval for modern attachment Select this to review documents referenced in Outlook as a modern attachment (a link to a SPO/ODB source) as well as any SPO/ODB documents that are included as a link in Outlook or Teams.</p> <p>Include versions from SharePoint Select this to make a copy of all versions of a SharePoint file per the version limits and search parameters of the collection.</p>

Microsoft Information Protection: Auto-classification with sensitivity labels in SPO, EXO, OneDrive for gov clouds

67125

Auto-classification with sensitivity labels in OneDrive, SharePoint Online, and Exchange Online will soon be available in GCC and GCC-High environments. Sensitivity labels are central to Microsoft Information Protection, enabling you to label important content to associate it with protection policies and actions like encryption and visual marking. With this release, you can start using sensitivity labels at scale for documents stored on OneDrive and SharePoint Online, and for emails in transit in Exchange Online automatically without manual user input.
