(Updated) New Power Platform features coming to Teams		MC219363
	check before:	**08/04/2020**
Updated September 11, 2020: We have updated the content below to provide additional information.	Status:	**Rolling out**
	Created:	07/28/2020
We are adding new "https://powerplatform.microsoft.com/" Power Platform features to make it easier for customers to create, deploy and manage key business apps and chatbots directly within Microsoft Teams.	Product:	Power Automate, Teams, Power apps
This message is associated with Microsoft 365 "https://www.microsoft.com/microsoft-365/roadmap?filters=searchterms=66407" Roadmap ID 66407.	Platform:	Online, World tenant
	Scope:	Administration, Licensing, User, Compliance
When this will happen	Ring:	General Availability
The rollout will begin in mid-September (previously mid-August) and be complete by the end of September (previously August).

Linked Item Details	66407 Title : Microsoft Teams: Microsoft Oakdale in Teams 66407 Description: Select Microsoft 365 and Office 365 subscriptions that include Power Apps and Power Automate are expanding with the introduction of Microsoft Project Oakdale– a built-in, flexible datastore supporting relational, image and file data with a one-click experience for deploying solutions natively in Teams. With Project Oakdale, Power Apps capabilities included in select Microsoft 365 and Office 365 licenses will expand to provide an integrated app studio for users to build and deploy custom apps within Teams. Similarly, Power Virtual Agents capabilities are being introduced to Teams. Users will now be able to build and deploy custom chatbots in Project Oakdale environments directly within Teams. New Power Automate capabilities will also be available in Teams, including the ability to trigger flows directly from Teams messages. 66407 Url : https://techcommunity.microsoft.com/t5/microsoft-teams-blog/microsoft-teams-is-shaping-the-future-of-work-with-low-code-apps/ba-p/1507180
MS Preperations	Once this update is complete, you will see new service plans – Microsoft Project Oakdale and Power Virtual Agents for Teams – in the list of plans included with your subscription. These changes will not impact other features in your subscription, besides what is mentioned above. However, you may consider updating your internal documentation to reflect these additional capabilities, as needed. The following admin controls are available in Teams Admin center to enable/disable the new functionality in public preview – App permissions policies: Admins can turn the Power Platform maker/builder experience off or on in Teams by selecting Power Apps and/or Power Virtual Agents applications available under 'Microsoft Apps'. This setting is available for a specific set of users or for the tenant all up. Note: Admins can turn the Power Platform one-click deployment experience off or on in Teams by selecting Shared Power Apps and/or Shared Power Virtual Agents applications available under 'Microsoft Apps'. This setting is available for a specific set of users or for the tenant all up. More information on App permissions policies can be found here: "https://docs.microsoft.com/en-us/microsoftteams/teams-app-permission-policies" Manage app permission policies in Microsoft Teams Existing Power Platform functionality within Office 365 remains unchanged. Learn more at the "https://techcommunity.microsoft.com/t5/microsoft-teams-blog/microsoft-teams-is-shaping-the-future-of-work-with-low-code-apps/ba-p/1507180" Microsoft Teams blog.
MS How does it affect me	Select Microsoft 365 and Office 365 subscriptions that include Power Apps and Power Automate are expanding with the introduction of Microsoft Project Oakdale – a built-in, flexible datastore supporting relational, image and file data with a one-click experience for deploying solutions natively in Teams. Your users will be able to access these public preview features in Teams beginning in mid-September. With Project Oakdale, Power Apps will provide an integrated app studio that lets users build and deploy custom apps within Teams. Your end users will also be able to build and deploy custom chatbots in Teams with the introduction of Power Virtual Agents. We are also adding Power Automate capabilities, including the ability to trigger flows directly from Teams messages. This new Power Platform functionality for Teams is included at no additional cost with your Microsoft 365 and Office 365 licenses. Existing Power Platform functionality available for use in Office 365 more broadly outside of Teams remains unchanged.

(Updated) Microsoft Information Protection: Exact Data Match will add support for salt

	check before:	**08/14/2020**
	Status:	**Rolling out**
	Created:	08/08/2020
	Product:	Microsoft Information Protection
	Platform:	Web, World tenant, Online
	Scope:	Compliance, Security, User, Administration
	Ring:	General Availability

Updated September 24, 2020: We are pleased to announce that this is available for all Standard organizations as applicable. We are in the progress of rolling this out for Government customers. Please see the updated timeline below. Thank you for your patience.

Soon, "https://techcommunity.microsoft.com/t5/microsoft-security-and/new-exact-data-match-edm-classification-helps-you-better-detect/ba-p/793526" Exact Data Match (EDM) will support salt in the data hashing process to improve data security.

Key points

Microsoft 365 Roadmap ID: "https://www.microsoft.com/microsoft-365/roadmap?filters=featureid=65207" 65207

Timing:Standard - Complete

Government - Complete by early October

Action: review and assess

Type:	Admin impact, New feature, Updated message	Tenant:

Docu to check	Service Description, Automation / Scripts, Working instructions for IT Support
Linked Item Details	65207 Title : Microsoft Information Protection: Exact Data Match will support SALT in the data hashing process to improve data security 65207 Description: Exact Data Match will support SALT in the data hashing process to improve data security. Adding a random string, known as a SALT, to each data value prior to hashing can make it much more challenging for an attacker to reverse engineer the original values.

MS Preperations	Once the feature is available, "https://docs.microsoft.com/microsoft-365/compliance/create-custom-sensitive-information-types-with-exact-data-match-based-classification#set-up-the-edm-upload-agent" download and install the appropriate updated EDM Upload Agent (Commercial/GCC, GCC-High, or DoD). Updated Upload Agents will be available when the feature reaches GA.
	
	If you had previously hashed, indexed, and uploaded data to the EDM service and are already using EDM and would like to add salt to that hashed data, you will need to re-hash and re-upload that data using the instructions provided on the EDM page.
	
	Learn more:
	"https://techcommunity.microsoft.com/t5/microsoft-security-and/exact-data-match-upcoming-news/ba-p/1492842" Exact Data Match Upcoming News
	    "https://techcommunity.microsoft.com/t5/microsoft-security-and/implementing-microsoft-exact-data-match-edm-part-1/ba-p/1345360" Implementing Microsoft Exact Data Match
	    "https://techcommunity.microsoft.com/t5/microsoft-security-and/microsoft-information-protection-and-compliance-webinar-page/ba-p/1184481" Webinar: Exact Data Match (EDM) classification ("https://aka.ms/MIPC/Video-EDMwebinar" video | "https://aka.ms/MIPC/Blog-EDMWebinar" deck/FAQ)

MS How does it affect me	Adding a random string, known as a salt, to each data value prior to hashing can make it much more challenging for an attacker to reverse engineer the original values. Customers can choose to use a custom salt or a random salt that is generated by Microsoft. The data hashed and uploaded for EDM will be more secure through the addition of the salt to the hashing process.

Microsoft Information Protection: Double Key Encryption

64646

check before:	**08/31/2020**
Status:	**In development**
Created:	07/21/2020
Product:	Microsoft Information Protection
Platform:	Online, World tenant
Scope:	Compliance, Security, Administration
Ring:	General Availability

Currently available in preview to Commercial tenants, Double Key Encryption from Microsoft allows you to protect your highly sensitive data while maintaining full control of your key. You can protect your data with two keys - your Azure key and your key in the Double Key Encryption service.

Microsoft 365 admin center: Microsoft 365 Priority Accounts

67145

check before:	**08/31/2020**
Status:	**Rolling out**
Created:	09/25/2020
Product:	Exchange, Microsoft 365 admin center
Platform:	Online, World tenant
Scope:	Administration, Compliance, Licensing
Ring:	General Availability

As the admin of a Microsoft 365 organization, you can now monitor failed or delayed email messages sent to your users who have a high business impact, like your CEO. You can enable this by adding users to your priority accounts list. Priority accounts are accounts that are essential to running your organization. Add executives, leaders, managers or other users who have access to sensitive or high priority information. The priority accounts feature is available only to organizations that meet both of the following requirements: Office 365 E3 or Microsoft 365 E3, or Office 365 E5 or Microsoft 365 E5; and at least 10,000 licenses and at least 50 monthly active Exchange Online users.

Type:	New feature, Admin impact	Tenant:

Seamlessly share personal lists in To Do

In MC215678 (June 2020), we announced that Microsoft To Do would support list sharing between personal Microsoft accounts and work or school accounts. We paused the rollout to incorporate your feedback. We are pleased to announce we are moving forward with this feature.

Key points

Microsoft 365 "https://www.microsoft.com/microsoft-365/roadmap?filters=searchterms=64658" Roadmap ID 64658

Timing: late September

Roll-out: tenant level

Control type: admin control

Action: review and assess by September 25, 2020

check before:	**09/25/2020**
Status:	**Rolling out**
Created:	08/26/2020
Product:	Azure Active Directory, Outlook, To-Do
Platform:	Windows Desktop, World tenant, Online
Scope:	Administration, UI, User, Compliance, Security
Ring:	General Availability, Targeted Release
Type:	Admin impact, New feature, User impact
Tenant:	

Links	64658,MC215678
Docu to check	User Knowledge base, Working instructions for IT Support
Linked Item Details	MC215678 Title : (Updated) New Feature: Seamlessly Share Personal Lists in To Do MC215678 Url : https://support.office.com/en-us/article/create-and-share-lists-4e5aeac6-8649-4813-aae5-2c2ddea2f292 64658 Title : Microsoft To Do: Support for Sharing Personal Lists 64658 Description: Microsoft To Do will now allow you to share lists from personal to work accounts.
MS Preperations	Once available, this feature will be enabled by default if you have not customized the setting for your tenant. You can manage the feature through Microsoft 365 admin center. You can review the setting in advance and ensure it is set to the experience appropriate for your organization. You can change it at any time; any changes can take up to 24 hours to go into effect. If a user joined a personal (MSA) list when the setting was enabled and you later disable it, the sync between the user and owner will stop within 24 hours. However, the user may continue to see the list for more than 24 hours. You might consider updating your training and documentation as appropriate. How to change the admin setting The admin setting will enable you to restrict people in your organization from joining lists owned by people outside your organization. However, whether or not the setting is enabled, enterprise users will not be able to share their lists with external personal accounts. Go To Microsoft 365 admin center Select Settings in the left hand pane Select Org settings Under Services select Microsoft To Do Select the correct setting in the right-hand fly-out that says "Allow your users to join and contribute to lists shared from outside the organization" Save the settings
MS How does it affect me	A personal Microsoft account (MSA) is an email address used to sign in to Microsoft services like Office 365, Xbox consoles, or Windows 10 PCs. Users can associate any email address as the user name for their MSA, including addresses from Outlook.com, Hotmail.com, Gmail, Yahoo!, or other providers. A work or school account is managed through Azure Active Directory (Azure AD) for a Microsoft 365 tenant. Microsoft To Do will support "https://support.microsoft.com/office/create-and-share-lists-4e5aeac6-8649-4813-aae5-2c2ddea2f292" list sharing between a personal account (MSA) and a work or school account (Azure AD). By default, users in your organization will be able to join, view, modify and add data to lists owned by an MSA. Users in your organization will not be able to share their lists with any account external to your tenant. Nor will users in your organization be able to join, view, modify or add data to lists owned by an external Azure AD account.

Announcing general availability of Microsoft Compliance Manager

MC222638

	check before:	**09/29/2020**
	Status:	**Rolling out**
	Created:	09/23/2020
	Product:	Compliance Score, Microsoft Compliance center
	Platform:	World tenant, Online
	Scope:	Administration, Compliance, Licensing, Security
	Ring:	General Availability

As announced at Ignite, Compliance Manager (formerly Compliance Score) is moving out of public preview and the tasks you previously found in Compliance Manager (via the "https://docs.microsoft.com/microsoft-365/compliance/get-started-with-service-trust-portal" Service Trust Portal) are now housed within the Microsoft 365 compliance center under Compliance Manager. We announced the public preview of Compliance Score in November 2019.

This message is associated with Microsoft 365 "https://www.microsoft.com/en-us/microsoft-365/roadmap?filters=searchterms=60771" Roadmap ID 60771.

When this will happenRollout will begin in mid-September and is expected to be complete by the end of September.

Type:	Admin impact, New feature	Tenant:

Links	60771
Docu to check	Working instructions for IT Support, User Knowledge base
Linked Item Details	60771 Title : Microsoft Compliance Manager general availability 60771 Description: Compliance Manager is the next generation of the existing Compliance Manager and Compliance Score solutions, which have been in public preview since November 2019. With this announcement, we are consolidating the functionality of these two solutions into one single solution, Compliance Manager, which sits in the Microsoft 365 compliance center. With Compliance Manager, you will benefit from intuitive end-to-end compliance management, a vast out-of-the-box assessment template library and built-in automation to scale your compliance across global, industrial and regional standards.
MS Preperations	Learn more about the benefits of Compliance Manager and "https://docs.microsoft.com/microsoft-365/compliance/compliance-manager" review Compliance Manager technical documentation for setup and implementation guidance. New licensing terms will be going into effect with general availability of the solution. "https://docs.microsoft.com/office365/servicedescriptions/microsoft-365-service-descriptions/microsoft-365-tenantlevel-services-licensing-guidance/microsoft-365-security-compliance-licensing-guidance#compliance-manager" Review the Microsoft 365 licensing guidance for security and compliance to see what is available for your subscription level. Visit the "http://compliance.microsoft.com/" Microsoft 365 compliance center to begin using the new Compliance Manager experience.
MS How does it affect me	Compliance Manager consolidates the functionality of Compliance Score and Compliance Manager preview solutions. You can see your compliance score, add a template and assessment, and manage improvement actions. You'll see some updates to your visual experience in the Microsoft 365 compliance center as these solutions are now housed within the same portal. Any existing assessments created during the public preview of Compliance Score will continue to be available for use.

Microsoft Compliance Center: Microsoft Compliance Manager general availability

Compliance Manager is the next generation of the existing Compliance Manager and Compliance Score solutions, which have been in commercial public preview since November 2019. With this announcement, we are consolidating the functionality of these two solutions into one single solution, Compliance Manager, which sits in the Microsoft 365 compliance center. With Compliance Manager, you will benefit from intuitive end-to-end compliance management, a vast out-of-the-box assessment template library and built-in automation to scale your compliance across global, industrial and regional standards.

Reminder: Retirement of legacy eDiscovery tools

check before:	**10/01/2020**
Status:	
Created:	09/23/2020
Product:	eDiscovery, Exchange, Microsoft 365 admin center, Microsoft Compliance center
Platform:	Online, World tenant
Scope:	Administration, Compliance, Security, User
Ring:	

As originally announced in MC200104 (January '20) we will be retiring legacy eDiscovery tools soon.
When this will happen
There are several key dates for this retirement and we're now approaching the October 1, 2020 milestone.
In-Place eDiscovery and Holds in the Exchange admin center (EAC)
 July 1, 2020: You won't be able to create new searches and holds, but you can still run, edit, and delete existing searches at your own risk. Microsoft Support will no longer provide assistance for In-Place eDiscovery Holds in the EAC.
 October 1, 2020: The In-Place eDiscovery Holds functionality in the EAC will be placed in a read-only mode. This means you'll only be able to remove existing searches and holds.
*-MailboxSearch cmdlets
 July 1, 2020: You won't be able to use the New-MailboxSearch cmdlet to create new In-Place eDiscovery searches and In-Place Holds, but you can still use the other cmdlets to run, edit, and delete existing searches and holds at your own risk. Microsoft Support will no longer provide assistance for these types of searches and holds.
October 1, 2020: As previously stated, the In-Place eDiscovery Holds functionality in the EAC will be placed in a read-only mode. This also means that you won't be able to use the New-MailboxSearch, Start-MailboxSearch, or Set-MailboxSearch cmdlets. You'll only be able to get and remove existing searches and holds.
For more information, please see "https://docs.microsoft.com/en-us/microsoft-365/compliance/legacy-ediscovery-retirement?view=o365-worldwide" Retirement of legacy eDiscovery tools.

Type: Tenant:

Effects for Operations

additions from MC200104:
Automatic assignments via Exchange / PowerShell of legal hold might break.

Recommendations

additions from MC200104:
Check your processes and tool, which set legal hold and eDiscovery functions and features, due to the retirement of Exchange Admin Center In-Place eDiscovery Holds, supporting cmdlets and EWS.

Links   MC200104

Description

additions from MC200104:
Microsoft plans maasive changes to the eDiscovery and legal hold features.

Docu to check   Working instructions for IT Support, Service Description, Automation / Scripts

Microsoft Teams: meeting recordings saved to OneDrive and SharePoint

MC222640

We're changing the storage for new Teams meeting recordings to be stored on, and served from, OneDrive and SharePoint (ODSP) - instead of Microsoft Stream (Classic). Customers are able to opt in, opt out, or take no action with regard to these changes.
This change will apply to customers who either opt in or take no action following this announcement.
Key points:
Microsoft 365 Roadmap ID: "https://www.microsoft.com/microsoft-365/roadmap?filters=featureid=67138" target="_blank" style="background-color: rgb(255, 255, 255); font-family: sans-serif; font-weight: 400;">67138
Timing:Early October (October 5, 2020) – You can enable the Teams Meeting policy to have meeting recordings saved to OneDrive and SharePoint instead of Microsoft Stream (Classic)
End of October (October 31, 2020) – Meeting recordings in OneDrive and SharePoint will have support for English captions via the Teams transcription feature.
Early to mid-November (Rolling out between November 1 -15 , 2020) – All new Teams meeting recordings will be saved to OneDrive and SharePoint unless you delay this change by modifying your organization's Teams Meeting policies and explicitly setting them to "Stream"
Q1 2021 – No new meeting recordings can be saved to Microsoft Stream (Classic); all customers will automatically have meeting recordings saved to OneDrive and SharePoint even if they've changed their Teams meeting policies to Stream"
Rollout: Tenant level
Control: "https://docs.microsoft.com/en-us/MicrosoftTeams/tmr-meeting-recording-change" Admin via PowerShell

Linked Item Details	67138 Title : Microsoft Teams: meeting recordings saved to OneDrive and SharePoint
	67138 Description: Ability to save Microsoft Teams meeting recordings to OneDrive and SharePoint for improved sharing capabilities, basic governance, automatic retention labels, go local, bring your own keys and, more that comes from recording video files and storing them in SharePoint and OneDrive.
More Info URL	https://docs.microsoft.com/en-us/MicrosoftTeams/tmr-meeting-recording-change
MS Preperations	Customers are able to opt in, opt out, or take no action with regard to these changes. Changes in this communication will apply to customers who either opt in or take no action.
	Tenant admins can opt in or opt out of OneDrive and SharePoint as the Teams meeting recording storage location via a Teams policy in PowerShell. Additionally, customers who wish to have captions for their meetings will need to enable transcript recording in Teams.
	In Q1 CY2021, saving Teams meeting recordings to Microsoft Stream (Classic) will no longer be allowed. Precise dates will be communicated in a subsequent post.
	Learn more: "https://docs.microsoft.com/MicrosoftTeams/tmr-meeting-recording-change" Use OneDrive for Business and SharePoint or Stream for meeting recordings
MS How does it affect me	This change impacts your organization in several ways:
	New featuresThe move to ODSP immediately unlocks long-awaited features including external and guest sharing, retention policy application (https://docs.microsoft.com/microsoft-365/compliance/apply-retention-labels-automatically), GoLocal support, and BYOK support for customers, with improved transcription quality, speaker attribution, transcript content search, and other features to follow in CY2021.
	Meeting storageNon-Channel meetings will be stored in the OneDrive of the person who clicked the record button in a special folder labeled "Recordings" – that sits at the top of the recorder's OneDrive. Channel meetings will be stored in a folderlabeled "Recordings" under a folder named after the channel under the Team's document library.
	PermissionsAll meeting invitees - except for external users – in non-channel meetings will automatically get a shared link to access the meeting recording. External users will need to be explicitly added to the shared list by the meeting organizer or the person that clicked the record button. For Channel meetings, permissions will be inherited from the owners and members list in the channel.
	Feature gapsThe following gaps exist today:
	Ability to block download of the video by meeting participants
	Ability to view and edit the transcript in the player, but closed captions will be present
	Non-English language transcripts/captions
	Variable playback speed in video player
	Transcript timeframe search (e.g., to find a specific point in time when something was discussed)

Microsoft 365 compliance center: Auto-apply retention labels for Teams meeting recordings

68689

With the storage of Teams meeting recordings moving to SharePoint and OneDrive, you can utilize the rich retention capabilities available in these platforms to manage the retention and deletion of meeting recordings. Support is also being added for automatic labeling capabilities to apply different retention periods or immutability to Teams meeting recording files, separated from the rest of your OneDrive and SharePoint files.

Microsoft Search is the intelligent search experience in Microsoft 365. We're improving Microsoft Search, adding a new option to view and manage your personal query history. With personal query history, you'll see your recent queries as you begin typing in the search box to help you get back to insights and information you recently used or accessed so you'll no longer have to bookmark your queries or memorize the right query to get you back to where you were. Your personal query history can be managed through your Office 365 My Account settings. New My Account privacy controls allow you to delete your query history or download your query history for future reference.

Microsoft Search: Smart Find (Find-in-Document) in Word, Excel, and PowerPoint   **68801**

	check before:	**11/30/2020**

Search your document like you search the web.   We're utilizing well-established web search technologies, such as query and document understanding, and adding deep learning based natural language models. This allows us to handle a much broader set of search queries beyond "exact match." Typos: When there is a misspelling in the query, search can now show related matches. For example, technincian vs. technician. Forms of words: When there are different forms of the word in document and query. For example: tech, technology, technologies"; or USA, U.S.A, United States, United States of America; or newborn, new born, new-born, etc. Synonyms: For example: citation, quotation, quote, reference might be all the candidates for a term that you are searching for inside the document. A multi-word query: A single word query might lead to too many search results. A modern semantic search can often yield better results. For example: as a query of Oil Price, the content having Price of Oil, Prices of the Oil, Cost of Oil can offer related matches from within the document content.

Docu to check	Working instructions for IT Support
Linked Item Details	66185 Title : Advanced eDiscovery: Supporting linked content from OneDrive and SharePoint Online (modern attachments) 66185 Description: To help streamline discovery of linked content, Advanced eDiscovery natively groups linked content from OneDrive and SharePoint Online in the same family as the original Outlook email or Teams and Yammer chat message—streamlining the process of collecting, reviewing, and exporting the related content without additional configuration.
MS Preperations	Ask the Advanced eDiscovery manager in your organization to review this new functionality in a pre-production tenant and to determine how your organization might use this enhanced document retrieval in its investigations. Learn more: "https://docs.microsoft.com/microsoft-365/compliance/add-data-to-review-set#define-options-to-scope-your-collection-for-review" Define options to scope your collection for review "https://techcommunity.microsoft.com/t5/microsoft-security-and/improving-ediscovery-workflows-and-enhancing-your-forensic/ba-p/1696658" Improving eDiscovery workflows and enhancing your forensic investigations
MS How does it affect me	Advanced eDiscovery in Microsoft 365 provides an end-to-end workflow to preserve, collect, review, analyze, and export data that's responsive to your organization's internal and external investigations. When Advanced eDiscovery administrators and managers use the Search tool to identify relevant documents, they can add those search results to a review set. Exchange 2016 introduced document collaboration that allowed on-premises users to integrate attachments stored on OD/SPO directly into email sent from Outlook on the web. Document collaboration is now supported by all Outlook clients. Rather than attach a file to an email, users insert a link to a file that is stored in OD/SPO. This feature is often called modern attachments, and it reduces storage demands on the Exchange server. However, because these files are stored outside of the Exchange server, until now they were not included in a collection and review set. Your Advanced eDiscovery team now has three options for collecting the results of a search into a review set (pre-existing or new): Conversational review set (beta) Select this to see email and chat enabled as threaded conversations. Enable retrieval for modern attachment Select this to review documents referenced in Outlook as a modern attachment (a link to a SPO/ODB source) as well as any SPO/ODB documents that are included as a link in Outlook or Teams. Include versions from SharePointSelect this to make a copy of all versions of a SharePoint file per the version limits and search parameters of the collection.

Type:	Admin impact, New feature	Tenant:

Links	63062
Docu to check	Service Description, User Knowledge base, Working instructions for IT Support
Linked Item Details	63062 Title : Records Management: Regulatory Records (public preview) 63062 Description: Provides customers the ability to declare items in SharePoint Online as regulatory items. These labels are more stringent label vs record labels. Targeted to Financial services or other industries who have WORM compliance requirements. Will update the Cohasset assessment to include SharePoint Online. 63062 Url : https://docs.microsoft.com/en-us/microsoft-365/compliance/records-management?view=o365-worldwide
MS Preperations	Review a "https://docs.microsoft.com/microsoft-365/compliance/records-management#compare-restrictions-for-what-actions-are-allowed-or-blocked" detailed comparison of the restrictions a regulatory record label enforces, including which actions are allowed or blocked. If you would like to take advantage of this new functionality, "https://docs.microsoft.com/microsoft-365/compliance/declare-records" here's how to get started. "https://docs.microsoft.com/microsoft-365/compliance/records-management" Learn about records management in Microsoft 365.
MS How does it affect me	If your organization requires records to comply with high immutability standards, you can leverage regulatory record labels to enforce the maximum restrictions available in Microsoft 365. This new capability, when configured as recommended, can help you meet SEC 17a-4, FINRA Rule 4511, and CFTC Rule 1.31 (c) – (d) requirements for SharePoint, OneDrive for Business, Exchange email messages, and certain Teams and Skype for Business content.

Information Governance: Retention for Yammer messages

MC222893

As announced at Ignite, we're "https://techcommunity.microsoft.com/t5/microsoft-security-and/what-s-new-in-microsoft-information-governance-and-records/ba-p/1681207" introducing the public preview of retention policies for Yammer for user and community messages in Yammer.
 This message is associated with Microsoft 365 "https://www.microsoft.com/microsoft-365/roadmap?rtc=1&filters=&searchterms=63064" Roadmap ID 63064.
 When this will happenWe'll begin gradually rolling this out at the beginning of October and expect it to be complete by early November.

Microsoft Search: User-centric report slicing for Microsoft Search Administrators

68803

check before:	**11/30/2020**
Status:	**In development**
Created:	09/22/2020
Product:	Microsoft Search
Platform:	World tenant, Online
Scope:	Administration, Compliance
Ring:	General Availability

User-centric report slicing enables the Search Administrator to gain better insights of their users by exposing the search query pattern(s) of an individual based on their geolocation, occupation and organization, and in turn, empowering the Search Administator to undertake additional administrative action (i.e., bookmark management, addressing abandoned queries, promoting popular sites) to refine and improve the search experience.

Ring:	Targeted Release

With our recent Mover acquisition, we are excited to expand our capabilities to allow moving content from third-party cloud storage providers starting with Box.com. When you're ready to move your content, click on the Migrate tab in the SharePoint admin center to start scan discovery, assessment, and migrate. You'll get detailed reports and the rest in a seamless transition of files and folders to Microsoft 365.

Microsoft Teams: Customer Key support (Preview)

Microsoft helps keep Teams data safe by encrypting it while at rest in Microsoft datacenters. Now we are extending this capability to enable customers to add a layer of encryption using their own keys for Teams, similar to Exchange Online, SharePoint Online and OneDrive.
