As originally announced in MC200104 (January '20) we will be retiring legacy eDiscovery tools soon.
When this will happen
There are several key dates for this retirement and we're now approaching the October 1, 2020 milestone.
In-Place eDiscovery and Holds in the Exchange admin center (EAC)
July 1, 2020: You won't be able to create new searches and holds, but you can still run, edit, and delete existing searches at your own risk. Microsoft Support will no longer provide assistance for In-Place eDiscovery Holds in the EAC.
October 1, 2020: The In-Place eDiscovery Holds functionality in the EAC will be placed in a read-only mode. This means you'll only be able to remove existing searches and holds.
*-MailboxSearch cmdlets
July 1, 2020: You won't be able to use the New-MailboxSearch cmdlet to create new In-Place eDiscovery searches and In-Place Holds, but you can still use the other cmdlets to run, edit, and delete existing searches and holds at your own risk. Microsoft Support will no longer provide assistance for these types of searches and holds.
October 1, 2020: As previously stated, the In-Place eDiscovery Holds functionality in the EAC will be placed in a read-only mode. This also means that you won't be able to use the New-MailboxSearch, Start-MailboxSearch, or Set-MailboxSearch cmdlets. You'll only be able to get and remove existing searches and holds.
For more information, please see "https://docs.microsoft.com/en-us/microsoft-365/compliance/legacy-ediscovery-retirement?view=o365-worldwide" Retirement of legacy eDiscovery tools.

MS Preperations   Migrate all usage to Microsoft 365 eDiscovery or appropriate alternatives. These are described at: "https://docs.microsoft.com/en-us/microsoft-365/compliance/legacy-ediscovery-retirement" Retirement of legacy eDiscovery tools. If you're interested in migrating existing In-Place eDiscovery searches and holds to the Microsoft 365 compliance center, please see "https://docs.microsoft.com/en-us/microsoft-365/compliance/migrate-legacy-ediscovery-searches-and-holds?view=o365-worldwide" Migrate legacy eDiscovery searches and holds to the Microsoft 365 compliance center.

MS How does it affect me   Any holds created by using In-Place eDiscovery Holds in the EAC (or by using the corresponding cmdlet) will continue to preserve data. In-Place eDiscovery searches and holds can be removed at any time.

Advanced eDiscovery: First set of Graph APIs in Public Preview

68808

check before:	**08/31/2020**
Status:	**Launched**
Created:	09/22/2020

The first set of Graph APIs that are available in public preview enables organizations to call the APIs to get a list of cases, read the properties of a case, and create, update, delete and retrieve information on the cases. Similar actions are available for your review set and review set queries. For example, you can automatically apply the auto generated query to filter out duplicate items, or you can automatically apply your own custom query to your review set.

Advanced eDiscovery now supports linked content (modern attachments) from OneDrive and SharePoint Online

MC222627

check before:	**09/29/2020**
Status:	**Rolling out**
Created:	09/23/2020

Advanced eDiscovery will now support linked content (modern attachments) from OneDrive and SharePoint Online (OD/SPO). Linked content can be shared in Teams and Yammer chat messages and Outlook emails.
This message is associated with Microsoft 365"https://www.microsoft.com/microsoft-365/roadmap?filters=searchterms=66185" Roadmap ID 66185.
When this will happenWe will begin rolling this out in late September and expect the rollout to be complete by the end of October.

Linked Item Details	66185 Title : Advanced eDiscovery: Supporting linked content from OneDrive and SharePoint Online (modern attachments) 66185 Description: To help streamline discovery of linked content, Advanced eDiscovery natively groups linked content from OneDrive and SharePoint Online in the same family as the original Outlook email or Teams and Yammer chat message—streamlining the process of collecting, reviewing, and exporting the related content without additional configuration.
MS Preperations	Ask the Advanced eDiscovery manager in your organization to review this new functionality in a pre-production tenant and to determine how your organization might use this enhanced document retrieval in its investigations. Learn more: "https://docs.microsoft.com/microsoft-365/compliance/add-data-to-review-set#define-options-to-scope-your-collection-for-review" Define options to scope your collection for review "https://techcommunity.microsoft.com/t5/microsoft-security-and/improving-ediscovery-workflows-and-enhancing-your-forensic/ba-p/1696658" Improving eDiscovery workflows and enhancing your forensic investigations
MS How does it affect me	Advanced eDiscovery in Microsoft 365 provides an end-to-end workflow to preserve, collect, review, analyze, and export data that's responsive to your organization's internal and external investigations. When Advanced eDiscovery administrators and managers use the Search tool to identify relevant documents, they can add those search results to a review set. Exchange 2016 introduced document collaboration that allowed on-premises users to integrate attachments stored on OD/SPO directly into email sent from Outlook on the web. Document collaboration is now supported by all Outlook clients. Rather than attach a file to an email, users insert a link to a file that is stored in OD/SPO. This feature is often called modern attachments, and it reduces storage demands on the Exchange server. However, because these files are stored outside of the Exchange server, until now they were not included in a collection and review set. Your Advanced eDiscovery team now has three options for collecting the results of a search into a review set (pre-existing or new): Conversational review set (beta) Select this to see email and chat enabled as threaded conversations. Enable retrieval for modern attachment Select this to review documents referenced in Outlook as a modern attachment (a link to a SPO/ODB source) as well as any SPO/ODB documents that are included as a link in Outlook or Teams. Include versions from SharePointSelect this to make a copy of all versions of a SharePoint file per the version limits and search parameters of the collection.
