Seamlessly share personal lists in To Do

MC220931

In MC215678 (June 2020), we announced that Microsoft To Do would support list sharing between personal Microsoft accounts and work or school accounts. We paused the rollout to incorporate your feedback. We are pleased to announce we are moving forward with this feature.

Key points

Microsoft 365 "https://www.microsoft.com/microsoft-365/roadmap?filters=searchterms=64658" Roadmap ID 64658

Timing: late September

Roll-out: tenant level

Control type: admin control

Action: review and assess by September 25, 2020

check before:	**09/25/2020**
Status:	**Rolling out**
Created:	08/26/2020
Product:	Azure Active Directory, Outlook, To-Do
Platform:	Windows Desktop, World tenant, Online
Scope:	Administration, UI, User, Compliance, Security
Ring:	General Availability, Targeted Release
Type:	Admin impact, New feature, User impact
Tenant:	

Links	64658,MC215678
Docu to check	User Knowledge base, Working instructions for IT Support
Linked Item Details	MC215678 Title : (Updated) New Feature: Seamlessly Share Personal Lists in To Do MC215678 Url : https://support.office.com/en-us/article/create-and-share-lists-4e5aeac6-8649-4813-aae5-2c2ddea2f292 64658 Title : Microsoft To Do: Support for Sharing Personal Lists 64658 Description: Microsoft To Do will now allow you to share lists from personal to work accounts.
MS Preperations	Once available, this feature will be enabled by default if you have not customized the setting for your tenant. You can manage the feature through Microsoft 365 admin center. You can review the setting in advance and ensure it is set to the experience appropriate for your organization. You can change it at any time; any changes can take up to 24 hours to go into effect. If a user joined a personal (MSA) list when the setting was enabled and you later disable it, the sync between the user and owner will stop within 24 hours. However, the user may continue to see the list for more than 24 hours. You might consider updating your training and documentation as appropriate. How to change the admin setting The admin setting will enable you to restrict people in your organization from joining lists owned by people outside your organization. However, whether or not the setting is enabled, enterprise users will not be able to share their lists with external personal accounts. Go To Microsoft 365 admin center Select Settings in the left hand pane Select Org settings Under Services select Microsoft To Do Select the correct setting in the right-hand fly-out that says "Allow your users to join and contribute to lists shared from outside the organization" Save the settings
MS How does it affect me	A personal Microsoft account (MSA) is an email address used to sign in to Microsoft services like Office 365, Xbox consoles, or Windows 10 PCs. Users can associate any email address as the user name for their MSA, including addresses from Outlook.com, Hotmail.com, Gmail, Yahoo!, or other providers. A work or school account is managed through Azure Active Directory (Azure AD) for a Microsoft 365 tenant. Microsoft To Do will support "https://support.microsoft.com/office/create-and-share-lists-4e5aeac6-8649-4813-aae5-2c2ddea2f292" list sharing between a personal account (MSA) and a work or school account (Azure AD). By default, users in your organization will be able to join, view, modify and add data to lists owned by an MSA. Users in your organization will not be able to share their lists with any account external to your tenant. Nor will users in your organization be able to join, view, modify or add data to lists owned by an external Azure AD account.

Push notifications for work accounts in Microsoft To Do

check before:	**09/29/2020**
Status:	**In development**
Created:	09/23/2020
Product:	To-Do
Platform:	iOS, World tenant, Android
Scope:	Administration, User, UI
Ring:	General Availability

Microsoft To Do mobile will soon support push notifications for shared list activities on work accounts. If you do nothing, when this feature rolls out, users in your organization will receive push notifications in the Windows, Android, and iOS versions of To Do for shared list activities such as task added, task completed, and task updated.

Key points

Microsoft 365 "https://www.microsoft.com/microsoft-365/roadmap?filters=searchterms=67114" Roadmap ID 67114

Timing: administration control available on September 22, 2020

Roll-out: tenant level

Control type: admin control

Action: review and assess before Monday, October 19, 2020

Type:	Admin impact, New feature, User impact	Tenant:

Docu to check	User Knowledge base, User Trainings
Linked Item Details	67114 Title : Microsoft To Do: Support for push notifications for shared list activities for work and school accounts 67114 Description: This update adds the ability to create Microsoft To Do push notifications in Work and School accounts just as you can in your Personal account.
MS Preperations	The admin toggle will be accessible on September 22, 2020. You should review it to ensure that it is set to the experience appropriate for your organization. Any changes may take up to 24 hours to go into effect. Should you enable this feature in your tenant, you might want to update your training and documentation. To review or change the setting, go the Microsoft 365 admin center. Navigate to Settings > Org settings Under Services, select Microsoft To Do Select the box next to Allow your users to receive push notifications for shared list activities to turn push notifications on or off.
MS How does it affect me	This feature will be enabled unless you take action before Monday, October 19, 2020. On that date, users in your organization will receive push notifications for shared list activities.

Forms: Pro (Standalone) for GCC

63574

Microsoft Forms Pro in GCC (Standalone) will be available in April 2020. Microsoft Forms Pro is an enterprise survey capability that helps businesses obtain the feedback they need to make smarter decisions. Powered by both Office 365 and Dynamics 365, Forms Pro supports businesses seeking to transform customer, product, and employee experiences. Forms Pro is built on Microsoft Forms, and it offers new capabilities that make capturing and analyzing customer and employee feedback simpler than ever. Your customers can respond to the surveys by using any web browser or mobile device. As the responses are submitted, analyze them with Power BI reports and make effective decisions accordingly.

MS How does it affect me	The features apply to lists and libraries, both in and out of Quick Edit mode. 1. Items with a Person column will appear using the new "pill" design format when a person's photo is displayed. Select one or more people to add to a Person column quickly, and the entry will display an updated look. 2. Items within a Choice column will support single, multi-choice, and manual fill as you add items. You'll see updated formatting right away and can update and remove choice fields and formatting selections previously applied. 3. Items with a yes/no column will appear with a check mark when the value is selected.

Changes in classic form customizations in modern lists and libraries

<div style="text-align:right">**MC222880**</div>

check before:	**10/02/2020**

We are changing how customized forms work inside SharePoint lists and
libraries that will affect tenants using the SharePoint classic experience.
Key points
Timing: late October to late November
Roll-out: tenant level
Control type: user control
Action: review and assess by October 25, 2020

Status:	
Created:	09/26/2020
Product:	SharePoint
Platform:	Online, World tenant
Scope:	UI, User, Developer
Ring:	
Type: Feature update, User impact	Tenant:

Docu to check	User Knowledge base
MS Preperations	This change affects only SharePoint list and form customizations after October 25, 2020. Therefore, your users need to take action only if they create new classic form customizations after October 25, 2020.
	If your users have a list or library forms customized using methods two or three above, they can ensure it continues to fall back to classic by setting an EditFormUrl or NewFormUrl property to point to the existing form URL.
	Users can also configure an entire list or library to use classic mode using Advanced settings
	Navigate to the list that you want to use classic mode.
	Select Settings Gear button and then select List Settings
	Select Advanced Settings
	Change the "List experience" setting to "Classic experience."
	Learn more
	"https://support.microsoft.com/office/differences-between-modern-and-classic-experiences-for-lists-and-libraries-30e1aab0-a5cc-4363-b7f2-09e2ae07d4dc" Differences between modern and classic experiences for lists and libraries
MS How does it affect me	Classic list and library forms support the following customizations:
	Set the ContentType.EditFormUrl or ContentType.NewFormUrl properties to point to a custom form URL
	Adding a Content editor web part or other web part to the form page
	By adding a JSLink to one or more fields that appear on the form
	Today, when one of these three customizations exists on a form inside a list or library that's configured to use the "https://docs.microsoft.com/sharepoint/dev/transform/modernize-classic-sites" SharePoint modern experience, those forms will continue to render in classic to ensure customizations are visible to all users.
	With this change
	All customizations in the above list that were in place before October 25, 2020 will continue to render in the classic SharePoint experience.
	For customizations created after October 25, 2020:List item one customizations will continue to render in the classic experience
	List items two and three customizations will no longer render in the classic experience by default
