Linked Item Details	67099 Title : Forms: Print a blank Form 67099 Description: This new feature allows form designer to print a blank form/quiz to responder, who cannot fill the online form, to finish the form. 64931 Title : Yammer: New reactions for post 64931 Description: Users will be able to react to posts in Yammer. New reactions include Like, Love, Laugh, Sad, Celebrate, and Thanks. 64931 Url : https://support.microsoft.com/en-us/office/use-reactions-in-new-yammer-02b05cf1-e920-4891-a5a4-0f181948adad
MS Preperations	To see who has reacted and how, users will need to opt-in to the new Yammer experience. You may want to direct your users to our "https://support.microsoft.com/office/use-reactions-in-new-yammer-02b05cf1-e920-4891-a5a4-0f181948adad" support document to help them understand how to use this feature.
MS How does it affect me	With this feature, users can express a range of emotions that a 'like' did not allow them to easily communicate. We hope reactions will allow Yammer users to connect better and to build a deeper sense of community. Users will be able to react to conversations and comments using a range of lightweight reactions Users will be able to see who has reacted and how

What's next to do minor Items

Advanced Audit: Mail send events

68807

Mail send event is generated when a user sends, replies to, or forwards an email. Whether the action was malicious or unintentional, this event can let investigators know what metadata was contained in the emails sent from a compromised account.

Advanced Audit: optional 10 year audit log retention add-on

68805

To help meet rigorous regulatory and internal compliance obligations or conduct longer running investigations, organizations can now add 10-year audit log retention to Advanced Audit. Once enabled, you can access the logs in the Microsoft 365 compliance center or through the Office 365 Management Activity API. The events will also soon be accessible across Microsoft 365 compliance solutions. 10-year audit lot retention is generally available and E5 customers can try the feature today for a limited time at no additional cost. An add-on will be required from early 2021 to access this capability

CAUTION New item - "Launched"

Advanced eDiscovery: First set of Graph APIs in Public Preview

68808

The first set of Graph APIs that are available in public preview enables organizations to call the APIs to get a list of cases, read the properties of a case, and create, update, delete and retrieve information on the cases. Similar actions are available for your review set and review set queries. For example, you can automatically apply the auto generated query to filter out duplicate items, or you can automatically apply your own custom query to your review set.

Advanced eDiscovery now supports linked content (modern attachments) from OneDrive and SharePoint Online   **MC222627**

|		
	check before:	**09/29/2020**
	Status:	**Rolling out**
	Created:	09/23/2020

Advanced eDiscovery will now support linked content (modern attachments) from OneDrive and SharePoint Online (OD/SPO). Linked content can be shared in Teams and Yammer chat messages and Outlook emails.
This message is associated with Microsoft 365"https://www.microsoft.com/microsoft-365/roadmap?filters=searchterms=66185" Roadmap ID 66185.
When this will happenWe will begin rolling this out in late September and expect the rollout to be complete by the end of October.

Docu to check	Working instructions for IT Support
Linked Item Details	66185 Title : Advanced eDiscovery: Supporting linked content from OneDrive and SharePoint Online (modern attachments)
	66185 Description: To help streamline discovery of linked content, Advanced eDiscovery natively groups linked content from OneDrive and SharePoint Online in the same family as the original Outlook email or Teams and Yammer chat message—streamlining the process of collecting, reviewing, and exporting the related content without additional configuration.
MS Preperations	Ask the Advanced eDiscovery manager in your organization to review this new functionality in a pre-production tenant and to determine how your organization might use this enhanced document retrieval in its investigations.
	Learn more:
	"https://docs.microsoft.com/microsoft-365/compliance/add-data-to-review-set#define-options-to-scope-your-collection-for-review" Define options to scope your collection for review
	"https://techcommunity.microsoft.com/t5/microsoft-security-and/improving-ediscovery-workflows-and-enhancing-your-forensic/ba-p/1696658" Improving eDiscovery workflows and enhancing your forensic investigations
MS How does it affect me	Advanced eDiscovery in Microsoft 365 provides an end-to-end workflow to preserve, collect, review, analyze, and export data that's responsive to your organization's internal and external investigations.
	When Advanced eDiscovery administrators and managers use the Search tool to identify relevant documents, they can add those search results to a review set.
	Exchange 2016 introduced document collaboration that allowed on-premises users to integrate attachments stored on OD/SPO directly into email sent from Outlook on the web. Document collaboration is now supported by all Outlook clients. Rather than attach a file to an email, users insert a link to a file that is stored in OD/SPO. This feature is often called modern attachments, and it reduces storage demands on the Exchange server. However, because these files are stored outside of the Exchange server, until now they were not included in a collection and review set.
	Your Advanced eDiscovery team now has three options for collecting the results of a search into a review set (pre-existing or new):
	Conversational review set (beta) Select this to see email and chat enabled as threaded conversations.
	Enable retrieval for modern attachment Select this to review documents referenced in Outlook as a modern attachment (a link to a SPO/ODB source) as well as any SPO/ODB documents that are included as a link in Outlook or Teams.
	Include versions from SharePointSelect this to make a copy of all versions of a SharePoint file per the version limits and search parameters of the collection.

Information Governance: Retention for Yammer messages

	check before:	**10/03/2020**
	Status:	**In development**
	Created:	09/26/2020
	Product:	Microsoft Compliance center, Yammer
	Platform:	World tenant, Online
	Scope:	Administration, Compliance, Security
	Ring:	Preview

As announced at Ignite, we're "https://techcommunity.microsoft.com/t5/microsoft-security-and/what-s-new-in-microsoft-information-governance-and-records/ba-p/1681207" introducing the public preview of retention policies for Yammer for user and community messages in Yammer.
 This message is associated with Microsoft 365 "https://www.microsoft.com/microsoft-365/roadmap?rtc=1&filters=&searchterms=63064" Roadmap ID 63064.
 When this will happenWe'll begin gradually rolling this out at the beginning of October and expect it to be complete by early November.

Type:	Admin impact, Feature update	Tenant:

Links	63064
Docu to check	User Knowledge base, Working instructions for IT Support
Linked Item Details	63064 Title : Information Governance: Retention policies for Yammer 63064 Description: Expand support for Yammer messages. 63064 Url : https://docs.microsoft.com/en-us/microsoft-365/compliance/manage-information-governance?view=o365-worldwide
MS Preperations	To leverage retention policies for Yammer messages, make sure that your Yammer Enterprise network is in "https://docs.microsoft.com/yammer/configure-your-yammer-network/overview-native-mode" Native Mode. Once your Yammer network is in Native Mode, go "https://compliance.microsoft.com/" Microsoft 365 compliance center and use the Information Governance solution to create a new retention policy for Yammer messages.
MS How does it affect me	If you are using Yammer Enterprise within your organization and wish to set retention or deletion policies to ensure you're keeping only the data you need in your tenant, you will be able to "https://docs.microsoft.com/microsoft-365/compliance/create-retention-policies#retention-policy-for-yammer-locations" target Yammer communities and users with new or existing retention policies.
